Sam Saves a Squirrel – Oral Reading

Sam and his mother just moved to a big city. He was new to the city, and 17
had not met any other children. He wanted to make some new friends soon. To 32
pass the time, he watched squirrels gather nuts and build nests in the trees in the 48
local park. 50

On Monday, Sam went to work with his mother, and met her new boss's 64
son, Ben. Both boys were friendly, and soon they began to talk about animals. 78

"I like to watch the squirrels in the park near my apartment," Sam told Ben. 93

"I like squirrels, too," said Ben. "Actually, I saw one sleeping on the 106
sidewalk on my way in." 111

"Huh, that's odd," said Sam. "I thought squirrels usually slept in trees." 123

"Let's check the internet and see if we can find out more about where 137
squirrels are supposed to sleep," Ben suggested. 144

They borrowed Ben's mom's laptop, and searched online for some 154
information about squirrels. They learned that squirrels don't usually sleep on 165
the ground. 167

"Maybe the squirrel you saw is injured," said Sam. 176

They decided to call the city park zoo and ask for help. The park zoo sent an 193
expert to examine the squirrel. She determined it was injured and took it to the 208
zoo hospital. 210

"I'm glad we were able to help the squirrel," said Ben. 221

"Yeah, so am I!" agreed Sam. He was glad he met Ben, too. He thought it 237
had been a terrific day. 242

****DON'T FORGET TO READ AND DO RETELL BEFORE ORAL READING****

Gutenberg – Oral Reading

Johannes Gutenberg was born in 1398, in Germany. His father worked in the 13
town mint, a place where coins were made. Young Gutenberg grew up learning a 27
lot about goldsmithing, or how to make things out of gold. 38

While he was a teenager, Gutenberg also worked at the town mint. He 51
learned about pressing designs onto metal coins, which gave him the idea of 64
pressing words onto paper to make books. 71

At that time, all books were handwritten one word at a time. It was very 86
slow. It took a very long time to copy all the words to make one book. Gutenberg 103
thought there must be a faster way. He thought if books were made by machine, 118
then many books could be made at one time. 127

Gutenberg came up with a way to make metal letters that could press ink 141
onto a page to print words. He lined up metal letters on a board to form words 158
and sentences. He learned that the metal letters had to be the same height to 173
print in a straight line. The machine was called a printing press. Books had never 188
been printed this way before. 193

Gutenberg started a book-printing business. In one shop, he printed Bibles. 205
In another shop, he printed other kinds of books. Gutenberg printed the first Bible 219
by machine in 1455. It was known as the Gutenberg Bible. Some of the first copies 235
still exist. They are among the world's greatest treasures. 244

The method Gutenberg invented for printing books has stayed the same for 256
hundreds of years. Next time you read a book, think of Gutenberg. He made 270
printing books faster and easier than ever before! 278
