Ideas for Co-Teaching Models during Remote Learning

One Teach, One Assist	Station Teaching	Parallel Teaching	Alternative Teaching	Team Teaching
One teacher instructs the whole class in the video lesson while the other teacher responds to text comments from students One teacher instructs the whole class in the video lesson while the other "presents" material on their screen and changes documents as needed or writes visual notes for students.	Teachers create various leveled assignments in the Learning Management System (LMS) assigned to specific students at their instructional level. Teachers may develop various video lessons or find resources at various levels to assign to students. Teachers meet with small groups at designated times and then students do independent work when not with a teacher.	Each teacher does the same lesson at the same time for two smaller groups to heighten engagement, participation, and understand. Materials, resources, and format can be identical.	Teachers address similar objectives with differing methods/resources. One teacher does a whole group lesson on video or live chat. Other teacher does a similar lesson with modification/differentiation of pacing, materials, or expectations with increased support for students who need that. This could be a separate session at the same time or alternate time.	Both teachers interact in video lessons or on chat, taking turns and building off of one another to model discussion or think aloud.

Possibilities for Co-Teacher Activities During Remote, Synchronous Lessons

While one teacher is leading the virtual classroom, the other could be...	
	• Writing color-coded notes on the virtual whiteboard • Gathering data on student participation and responses • Verbally clarifying or restating with different terms or doing so in the chat • Echoing keywords from Teacher A and asking students to echo • Restating the learning target during the lesson • Asking students to stand, snap, stomp, turn video on/off, thumbs up/thumbs down, etc. in response • Preparing breakout room assignments based on student need • Finding websites and adding links for student access • Sending private messages to individual students • Typing chat stems, sentence starters, direction steps • Asking students to pause and summarize in one sentence • Directing all students to generate and submit one question • Creating a no-stakes quiz – 2 or 3 questions for student recall • Adding tips on how to maintain attention in a virtual lesson • Modeling annotation on documents so students have an example

Co-Teacher Responsibility and Considerations During Remote Learning

Professional Etiquette	Maintaining LMS	Curriculum	Classroom Management	Communication Plan
Share assignments 24 hours prior to posting to allow co-teacher to make accommodations/modifications.	Posting activities daily	Identify objectives/ standards	Developing LMS routines/expectations	Communication with co-teacher: Email, phone, chat, office hours
Schedule regular co-planning times - It is okay to set specific response and collaboration times.	Responding to student comments	Creating a Remote Learning Plan (Weekly)	Develop video and chat routines and expectations	Communication with grade level counterparts
CC your teacher on all communication with students, caregivers, admin regarding shared responsibilities.	Tracking Student Engagement/ Participation	Creating a Remote Learning Plan (Unit)	Develop a grading procedure	Communication with admin/coaches
Share responsibilities with one another - ask each other for help and support.	Moderating Content and Reviewing completed work	Plan lessons (if co-planning, identify the day(s)/time(s) you will meet	Develop a collaborative participation tracking tool	Communicate with caregivers
Establish specific roles and responsibilities for each teacher from the menu and add them as appropriate.		Creating Assessments	Correcting assignments	Communicate with highly engaged students (phone, email, chat, teleconference)
		Organize, Collect, and format materials	Communicate IEP goals and objectives	Communicate with disengaged students (phone, chat, email, teleconference)
		Differentiate/ Modify lessons	Providing one to one assistance	Communicate with related services staff

REMOTE LEARNING

Tips for Co-Teaching

PLANNING

Created a shared folder where you can both access and share lesson plans and activities.

Be specific -- include who will be doing what.

Include space to record accommodations & notes as needed, too.

SCHEDULE WEEKLY CHECK-IN TIMES

Use your phones or a teleconferencing tool to meet together. Use this time to to check in with one another, discuss upcoming lessons, reflect on past activities, collaborate, and ask questions.

SET UP MULTIPLE HOSTS/PANELISTS

Explore the settings on your teleconferencing platform, and share the host controls (or a host and panelist setting).

Then you can both control screen sharing, video recording, breakout rooms, etc.

DETERMINE ROUTINES & RESPONSBILITIES

Develop a schedule & method for keeping track of activities, lessons, & responsibilities.

Decide for each lesson/activity who will be doing what.

Make sure assessment strategies are clear and agreed upon.

ENSURE ACCESS TO ALL PLATFORMS & USE "WE"

Ensure both teachers have access to all platforms and that they have editing rights so that they can view student work, add activities, respond to students, add grades, etc.

Use "we" statements in activities & communication & model activities together.

SHARE SUCCESSES

Let your co-teacher know when there's a breakthrough, if something a student submits makes you laugh, or you see a student grow.

Celebrate together!
