# Coaching for Equity: Minnesota Educator Dispositions System™ Pilot 2015-16

https://sites.google.com/a/umn.edu/umn-dispositions-assessment-framework/home

## DEVELOPMENT

**DRIVING QUESTIONS**

**Based on pilot data, what modifications need to be made to MnEDS?**

**What supports and tools need to exist for multi-level integration?**

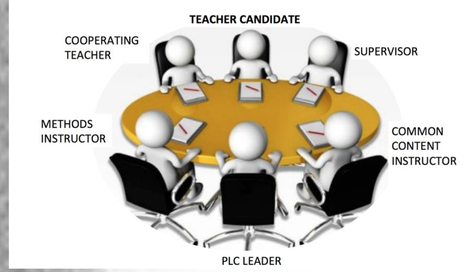

### Definition of Disposition

The commitments you make as a classroom teacher are evident in the pedagogical choices you make, the curriculum you write, your interactions with students, teachers, and colleagues, and in the ways you carry yourself as an educator.

### Disposition Strands

1. Assets
2. Role of self
3. Collaboration & communication
4. Care
5. Intentional professional choices
6. Navigation
7. Imagination & innovation
8. Advocacy

**Dialogic Process Among Teacher Candidate and Teacher Educators**

**Developing and implementing MnEDS—**
**An assessment framework, rubrics, and support materials**

| | |
|---|---|
| **Teacher Candidates** | Glossary<br>User-friendly format for rubrics<br>"Thinking Behind the Strands" |
| **Supervisors** | Coaching vignettes and questions<br>Role-specific guidelines<br>How to use the MnEDS™ in triad conversations |
| **Faculty / Program Leads** | Communication emails<br>Invitations to supervisor trainings<br>Providing feedback on rubric development |
| **Cooperating Teachers** | Coaching questions<br>Assessor instructions |
| **Policy** | College level support for new assessment for all programs |

**Distributed Knowledge**

**Formative Assessment**

**Social Justice**

| |
|---|
| What kinds of evidence demonstrates a candidate's dispositions? How does that evidence acknowledge the context in which the disposition is manifested? |
| What supports are needed to enable coaching and assessment of dispositions for teaching? How are the supports prepared for a variety of stakeholders? |
| How do we design coaching toward developing dispositions? |
| How is equity evident in our development work? |

## IMPLEMENTATION

**DRIVING QUESTIONS**

**How do we simultaneously drive technical and conceptual uptake?**

**What evidence will illustrate conceptual understanding and enactment?**

**Strand 1: Assets rubric as implemented in pilot**

| Counter Evidence | Awareness | Commitment | Enactment |
|---|---|---|---|
| Does not recognize the assets of students, families, or communities.<br>Sees deficits rather than assets of students, families, or communities.<br>Teaching is dominated by what students, families, or communities lack instead of the strengths they bring. | Distinguishes between assets & deficits in reference to students, families, schools, & communities.<br>Recognizes students' cultural & linguistic resources are essential to their achievement.<br>Can describe strategies for learning about the strengths of students, their families & communities & its importance to teaching. | Commits to using the strengths of students, families, & communities to affect teaching & learning.<br>Recognizes own / others' deficit views of students, families, communities when they emerge & works to rectify them, seeking assets instead.<br>Actively seeks to learn about students, their families, and the school community and the assets they bring. | Actively employs strategies to identify the assets of students, families, & communities & integrates those assets in teaching.<br>Engages with students, families and communities outside of the school day in order to connect with community educators & resources & bring these into classroom teaching & learning. |

**System Development Questions Aligned to Conceptual Framework**

| |
|---|
| How are dispositions contextual? |
| Who is responsible for assessing TCs' dispositions (supervisors, faculty, cooperating teachers) |
| What kinds of coaching do stakeholders need about dispositions? |
| How are we holding ourselves accountable to an equity lens across contexts and with multiple stakeholders? |

## RESEARCH

**DRIVING QUESTIONS**

**How does an assessment become a means of disrupting systems?**

**In what ways does this system create institutional cultural change?**

### Validity Study Data Collection 2014-15

- 2 two-hour focus groups with 11 mentors from a large urban partner school district
- 1-hour focus group with 25 participants at multicultural education conference
- 30-minute session with 23 participants at national meeting of teacher educators
- 60-minute session with 40 teacher educators
- 5 University supervisors' journal reflections and annotated dispositions frameworks for teacher candidates
- Interviews with 4 supervisors
- Journal reflections from 2 teacher candidates, 5 annotated dispositions frameworks, interviews with 2 teacher candidates

### Validity Study Outcomes

- Relevance rankings and focus group data show strong resonance with the relevance of each dispositional strand with regard to successful teaching in urban schools
- The strands *Role of Self* and *Care* received the most positive attention from participants
- The strands *Collaboration and Communication*, *Navigation*, and *Advocacy* proved to be difficult for teacher educators to locate evidence
- For school mentors, the "coachability" of a beginning teacher is a key starting point that needs to be in place when hired and the current framework does not yet speak directly to this disposition

### UMN Pilot Participation 2015-16

14 instructors

23 supervisors

34 cooperating teachers

112 teacher candidates

**Pilot Data Collection**

Dispositions rubrics (112 sets)
Field notes, photos, videos from participant trainings
Role-alike focus groups
Individual interviews

| |
|---|
| How do different stakeholders define dispositions through the evidence they collect? |
| How do different stakeholders see and emphasize different dispositions? |
| How do different stakeholders coach for dispositions? |
| How do different stakeholders assess a TC's dispositions for equity? How does an assessor's own lens on equity impact their assessment of a TC's dispositions? |
