Future Research, Development, and Use of Implementation Science

Fourth in the Implementation Science Seminar Series

Sponsored by Minnesota Department of Education and

Center for Early Education and Development @ Urban Research and Outreach/Engagement Center

Thursday, May 30, 2013 | 3:30 pm to 5:00 pm

Today's Session

- NAZ Seal of Effectiveness – A Method for Building Local Programs Designed for Successful Implementation (Laura Potter)
- Dissemination and Implementation in Children's Mental Health (Joel Hettler)
- Where do We Go From Here? (Scott McConnell)
- How was this? (Cammy Lehr)

http://z.umn.edu/ImplementationScience2

Implementation Science
in the Northside Achievement Zone

LAURA POTTER

Implementation Math: Multiplicative

Effective Innovations The "WHAT"

×

Effective Implementation The "HOW"

=

Positive Educational Outcomes for Children

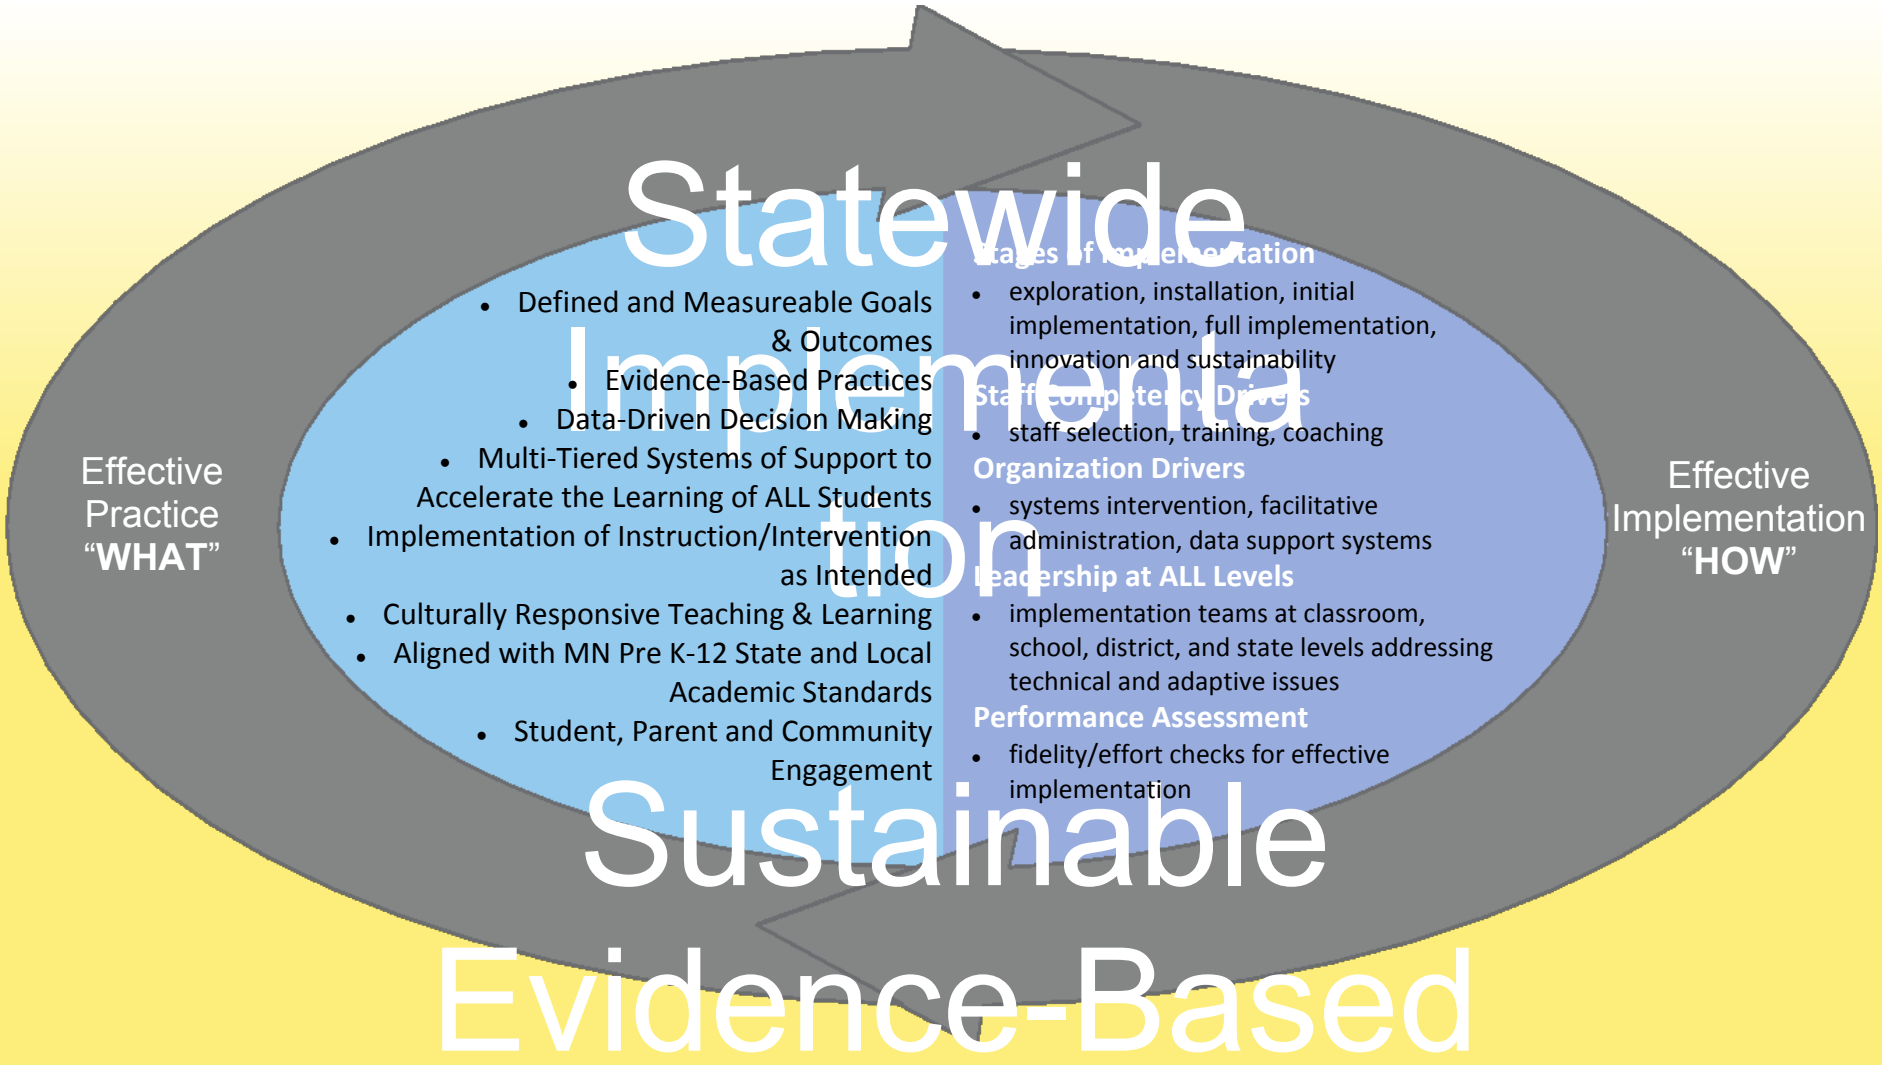

Remember that any number times 0 is 0 !!!!

Students Cannot Benefit from Instructional Practices or Interventions That They Do Not Receive

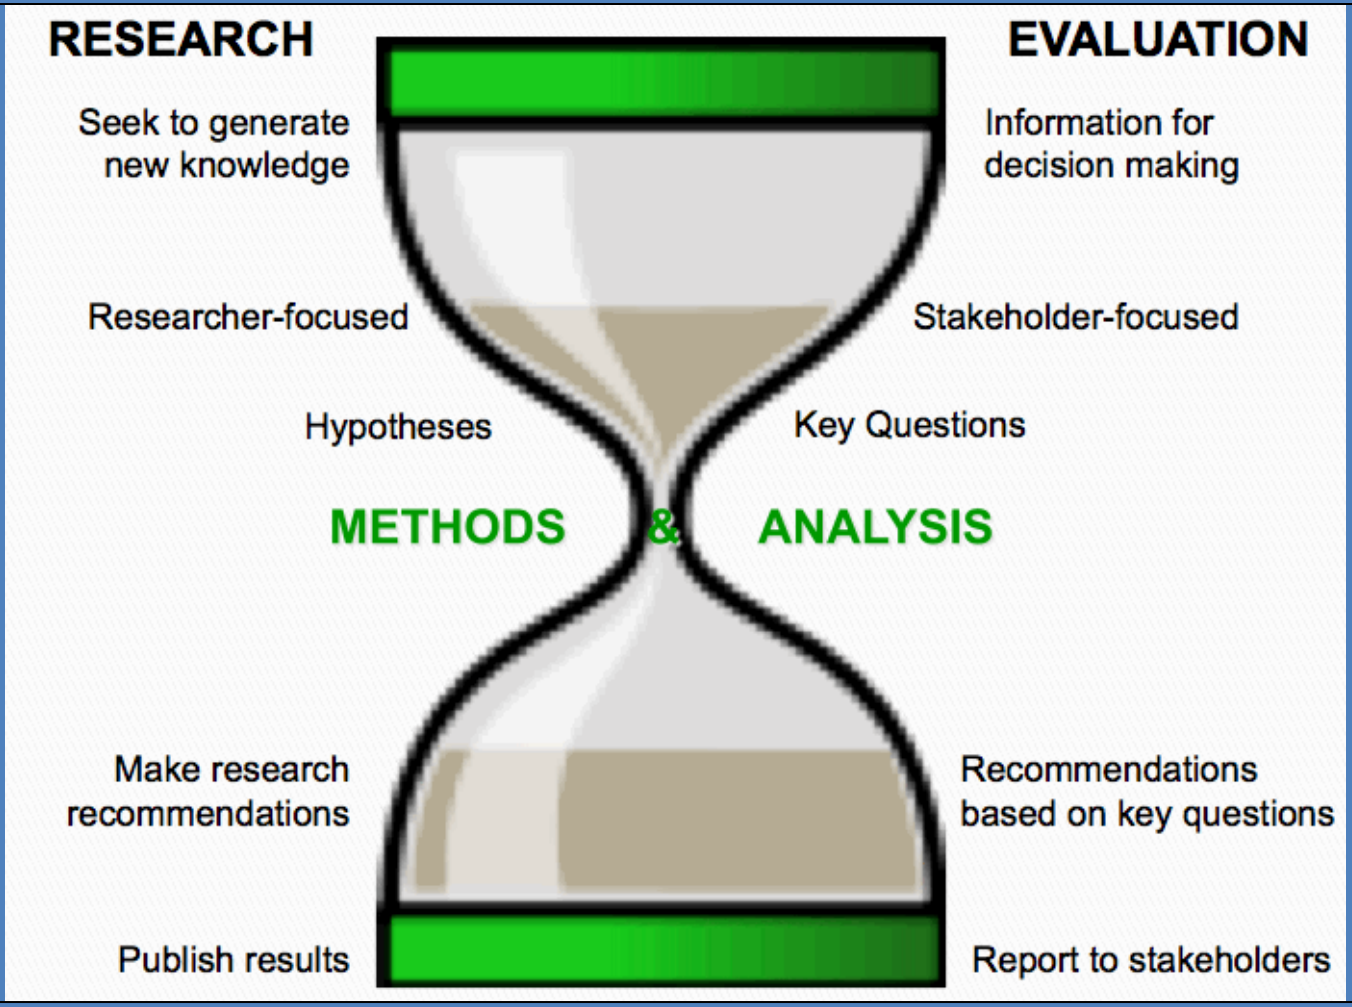

Slide created by the Minnesota Department of Education

Common Principles of Effective Practice (CPEP)

Building Capacity for Effective Implementation of Evidence-Based Practices Resulting in Positive Student Outcomes

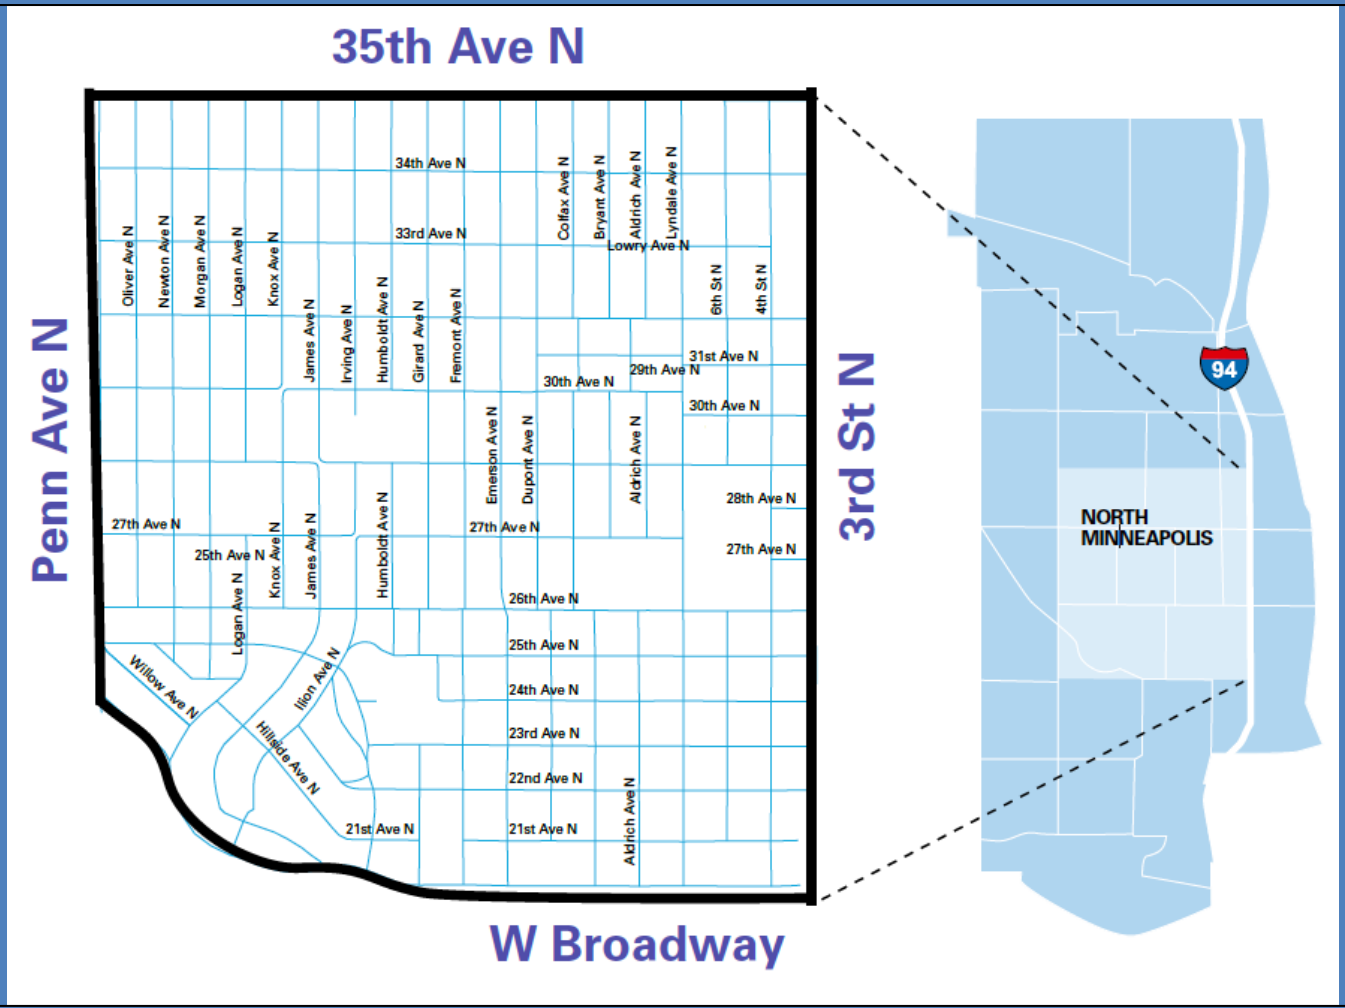

Research and evaluation

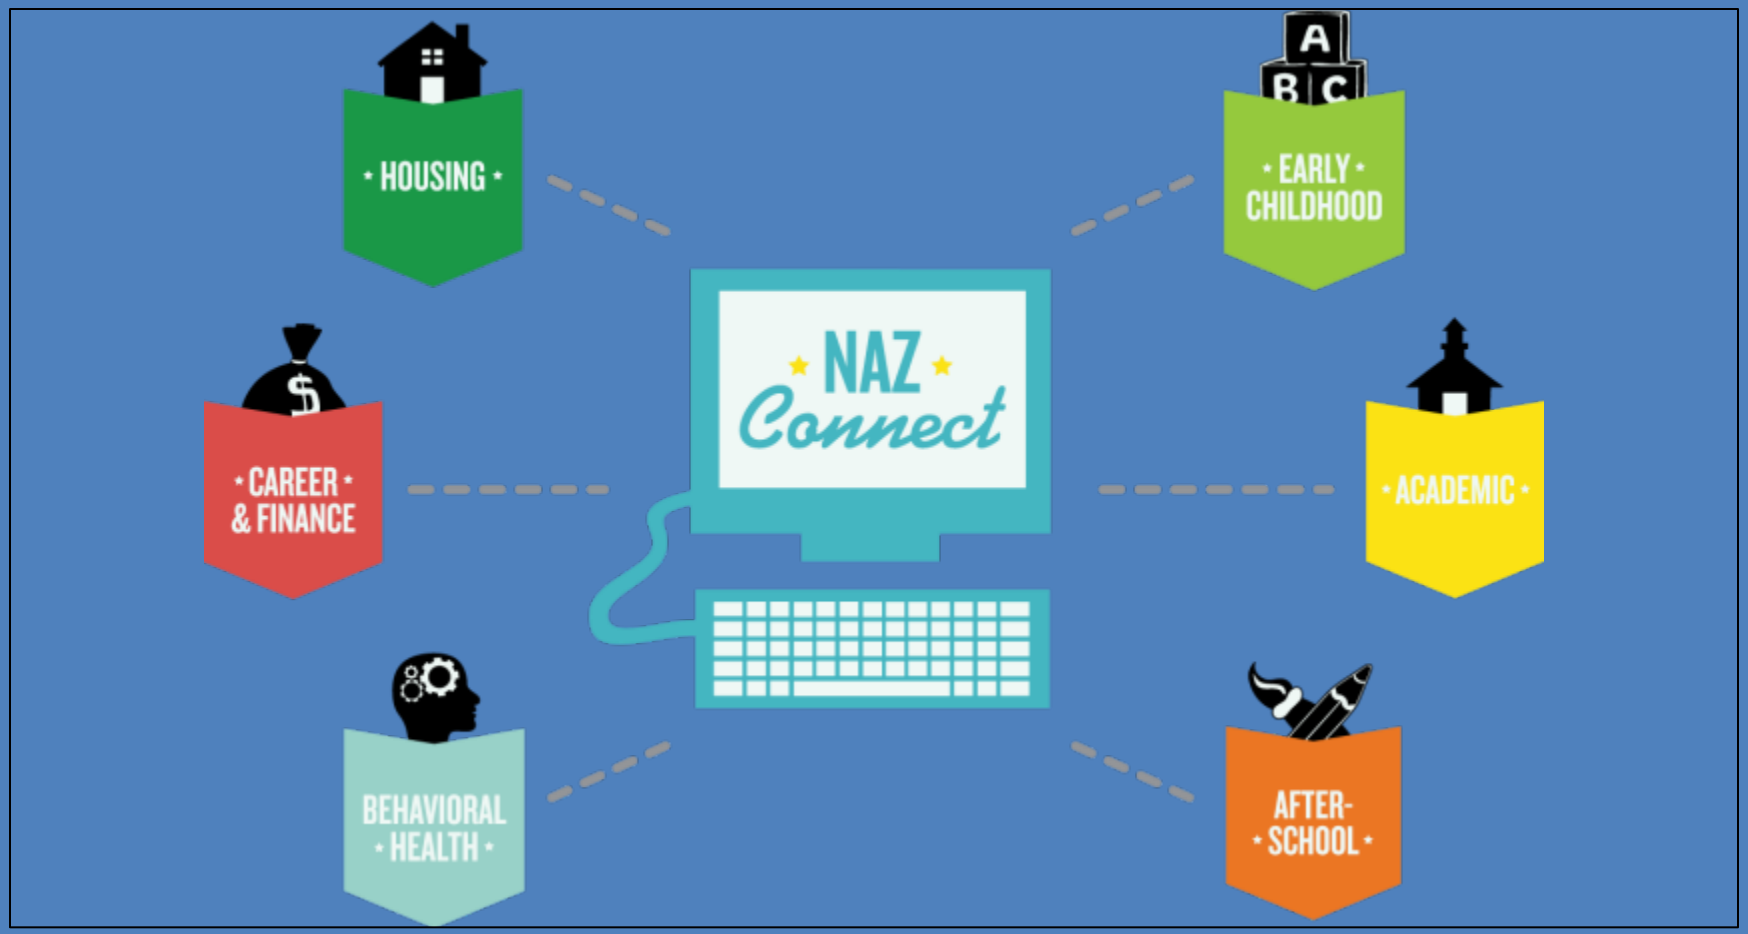

Evaluation as An arena for Implementation Science

"Implementation research is the scientific study of methods to **promote the systematic uptake of research findings and other evidence-based practices into routine practice**, and, hence, to improve the quality and effectiveness of health services and care." –Eccles & Mittman, 2006

The Northside Achievement Zone (NAZ)

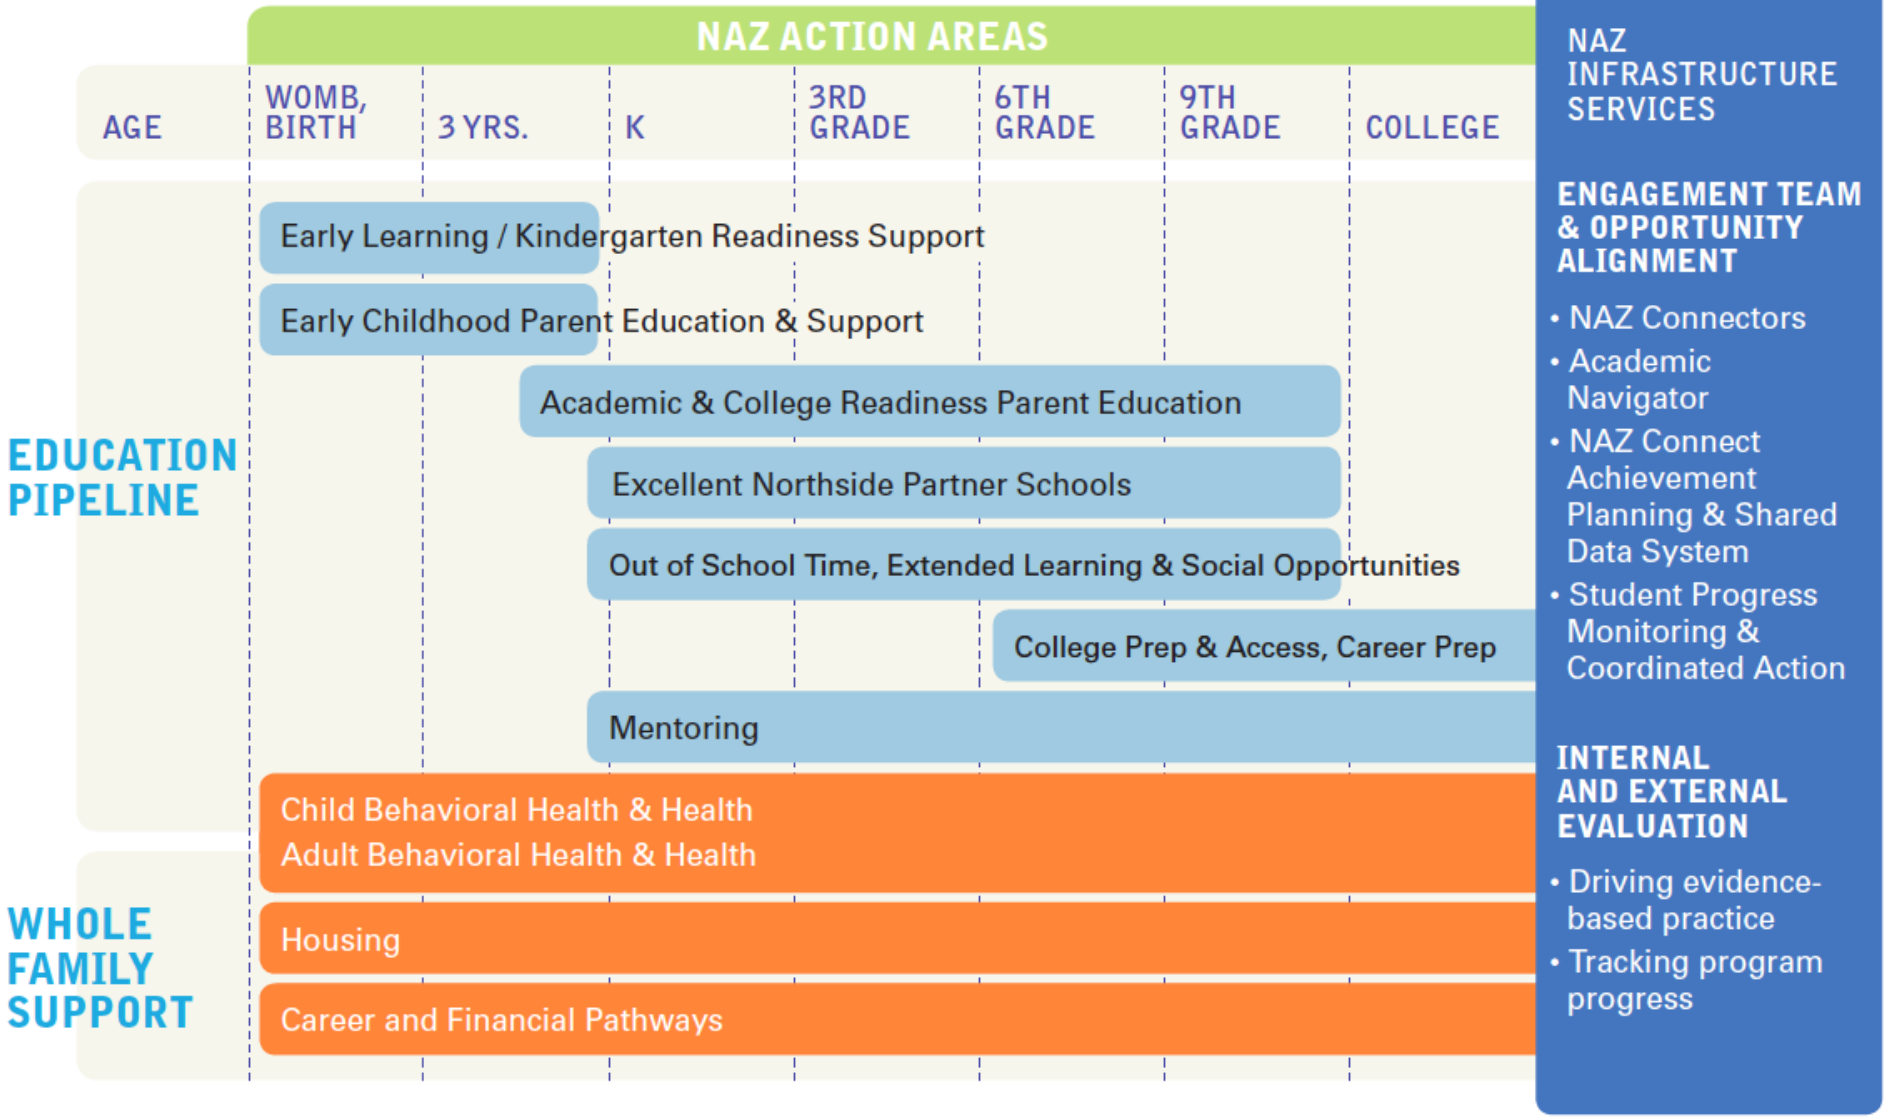

NAZ Action Areas

Education Pipeline

NAZ CONTINUUM

Purpose of NAZ Internal Evaluation

To ensure that all aspects of the continuum of solutions feature *elements of known, effective practice*

To ensure that all aspects of the continuum *will improve* systematically and continuously over time.

To allow NAZ to monitor its work and measure impact across all aspects of the continuum of solutions by *describing the status, implementation, and short-term effects* of NAZ solutions

In short – ***to create an infrastructure for NAZ to function as an intermediary of innovation, implementation and impact***

NAZ Seal of Effectiveness

Selection and documentation of known, effective practices for each action area

Ongoing assessment of implementation

Monitoring short-term effects and systematic practice improvement to build on lessons learned.

Developed alongside Action Team

NAZ Seal of Effectiveness Process

1. Develop Solution Plan

- 1.1 Launch process: schedule meetings, get goals, action team contact info *(eval)*
- 1.2 Review goals and revise to evaluation language *(eval)*
- 1.3 Strategic planning session: map process for developing solution plan *(action team, eval, NAZ Central)*
- 1.4 Send plan dev materials to action team; include evidence-based practices from CEED *(eval)*
- 1.5 Action team reviews materials *(action team)*
- 1.6 Plan development meeting *(action team, NAZ Central, eval)*
- 1.7 Action team reviews plan *(action team)*
- 1.8 Meeting: final plan revision *(action team, eval, NAZ Central)*

2. Review & Adopt Program Solution Plans

- 2.1 Complete peer review *(Internal evaluators, with consultation from Action Team and NAZ Central)*
- 2.2 Review and possible revision of program solution plan *(NAZ Central and Action Team)*
- 2.3 Identify NAZ Promising Practices *(NAZ Central)*

3. Implementation & Progress Monitoring

- 3.1 Develop implementation plan *(Action Team and NAZ Central)*
- 3.2 Develop measurement plan *(Internal evaluators with NAZ Central, Action Team)*
- 3.3 Report progress monitoring results *(Internal Evaluators)*
  1. Is this practice being implemented as intended (i.e., fidelity)?
  2. Are we engaging enough children and families (i.e., scale)?
  3. Is this practice effective at doing what we hoped to achieve (i.e., efficacy)?

Step 1
Selection and Documentation of Planned Practices

Action team develops goal(s)

- E.g. *Prenatally through age 3, children's age-appropriate development toward kindergarten readiness will be monitored, and services and supports will be provided as needed.*

Action team develops Solution Plans

- Reflect expert perspective of team members
- Draw on documented effective practices
- Articulate core components: Essential Active Ingredients (EAIs), including necessary conditions, frequency and dosage of each EAI

Peer Review

Action Team and NAZ Central adopt solution plan as a set of *NAZ Promising Practices*

Step 2
Ongoing assessment of implementation

Internal Evaluation team, with consultation from Action Team, develops measures to answer three questions

- Is this practice being implemented as intended (i.e., fidelity)?
- Are we engaging enough children and families (i.e., scale)?
- Is this practice effective at doing what we hoped to achieve (i.e., efficacy)?

Report results to Action Team lead and NAZ Central

- Quarterly reports on scale and efficacy
- Yearly comprehensive reports on scale, efficacy, fidelity

Step 3
Monitoring and systematic improvement

Develop and implement progress monitoring assessment

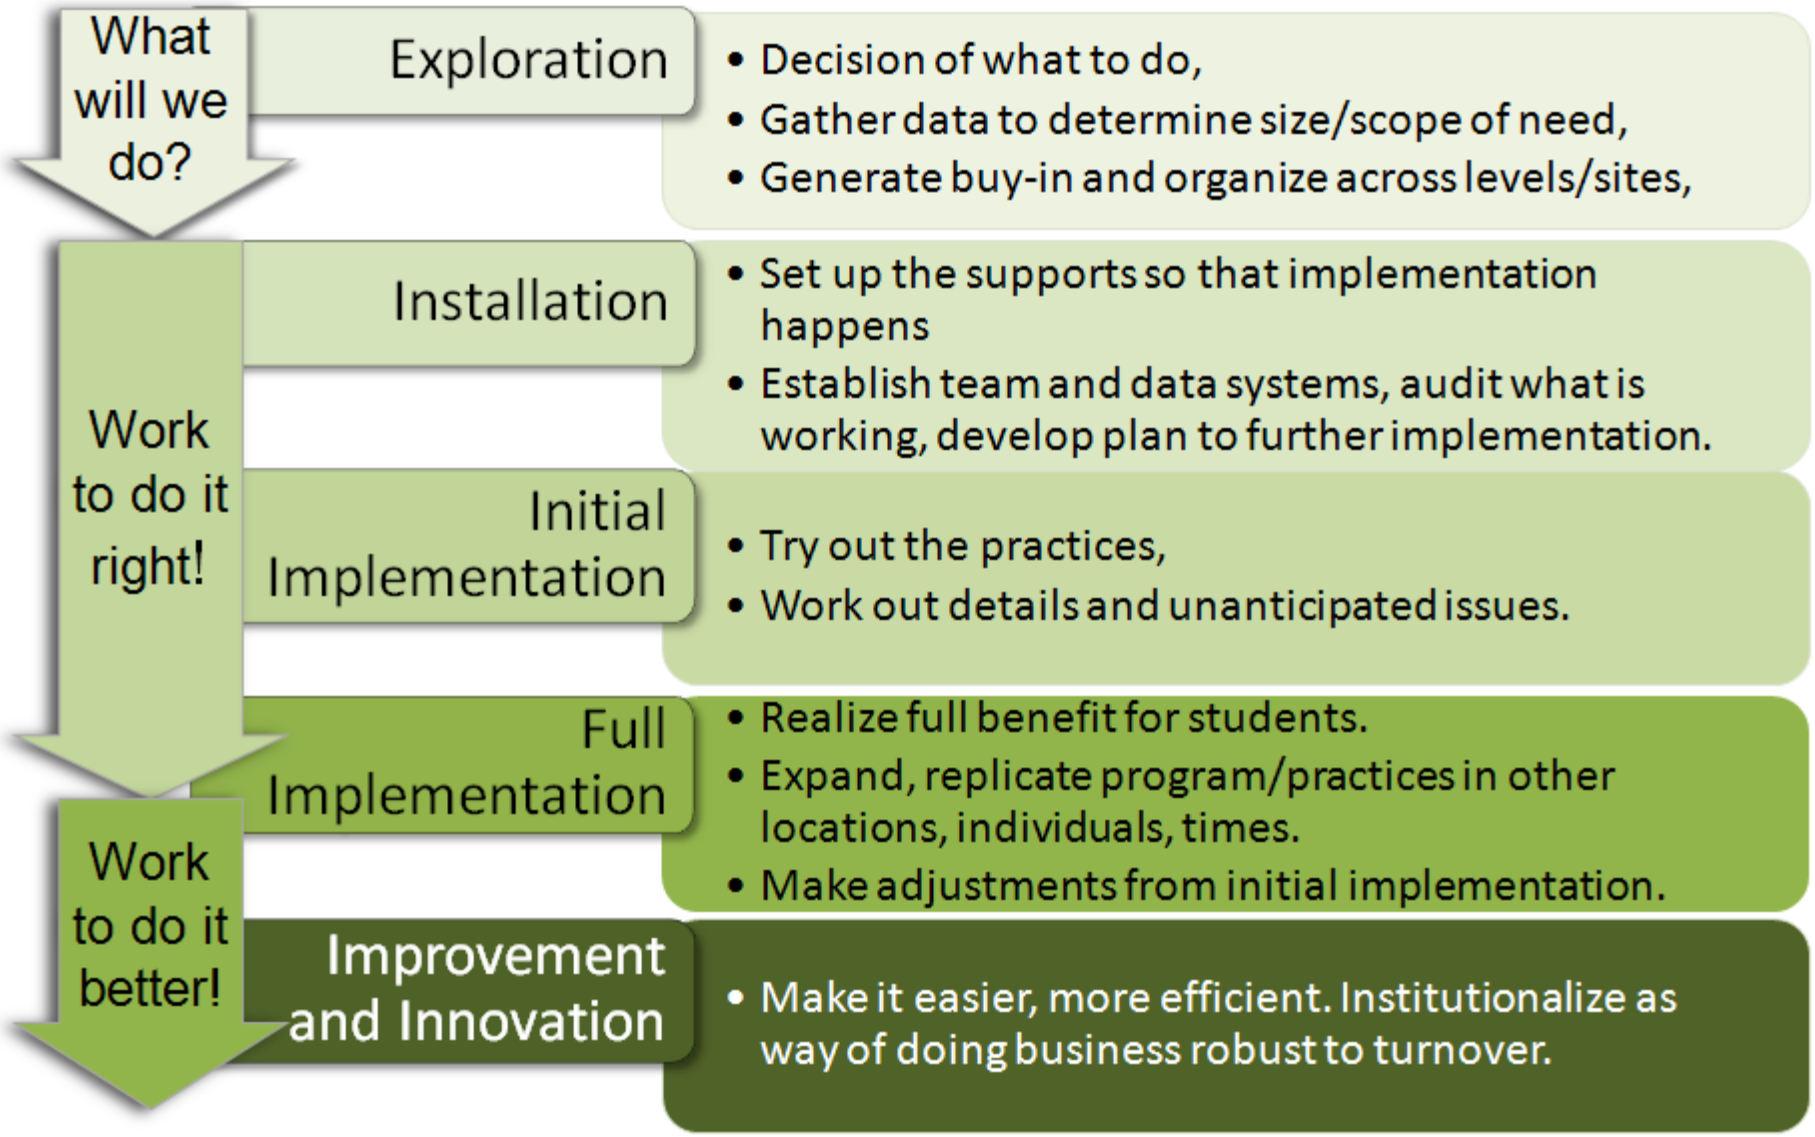

- Common measures across all children and families
  - Brief, easy to collect, related to checkpoint outcomes
  - Repeatable (monthly to quarterly) and sensitive to effects of intervention
- Initial focus on academic achievement
  - Later inclusion of social/behavioral status, family status

Disaggregate progress data by Action Team, NAZ Promising Practice elements, other factors (partner, family status, etc) as needed

Facilitate review and diagnostic/remedial steps by Action Team, NAZ Central

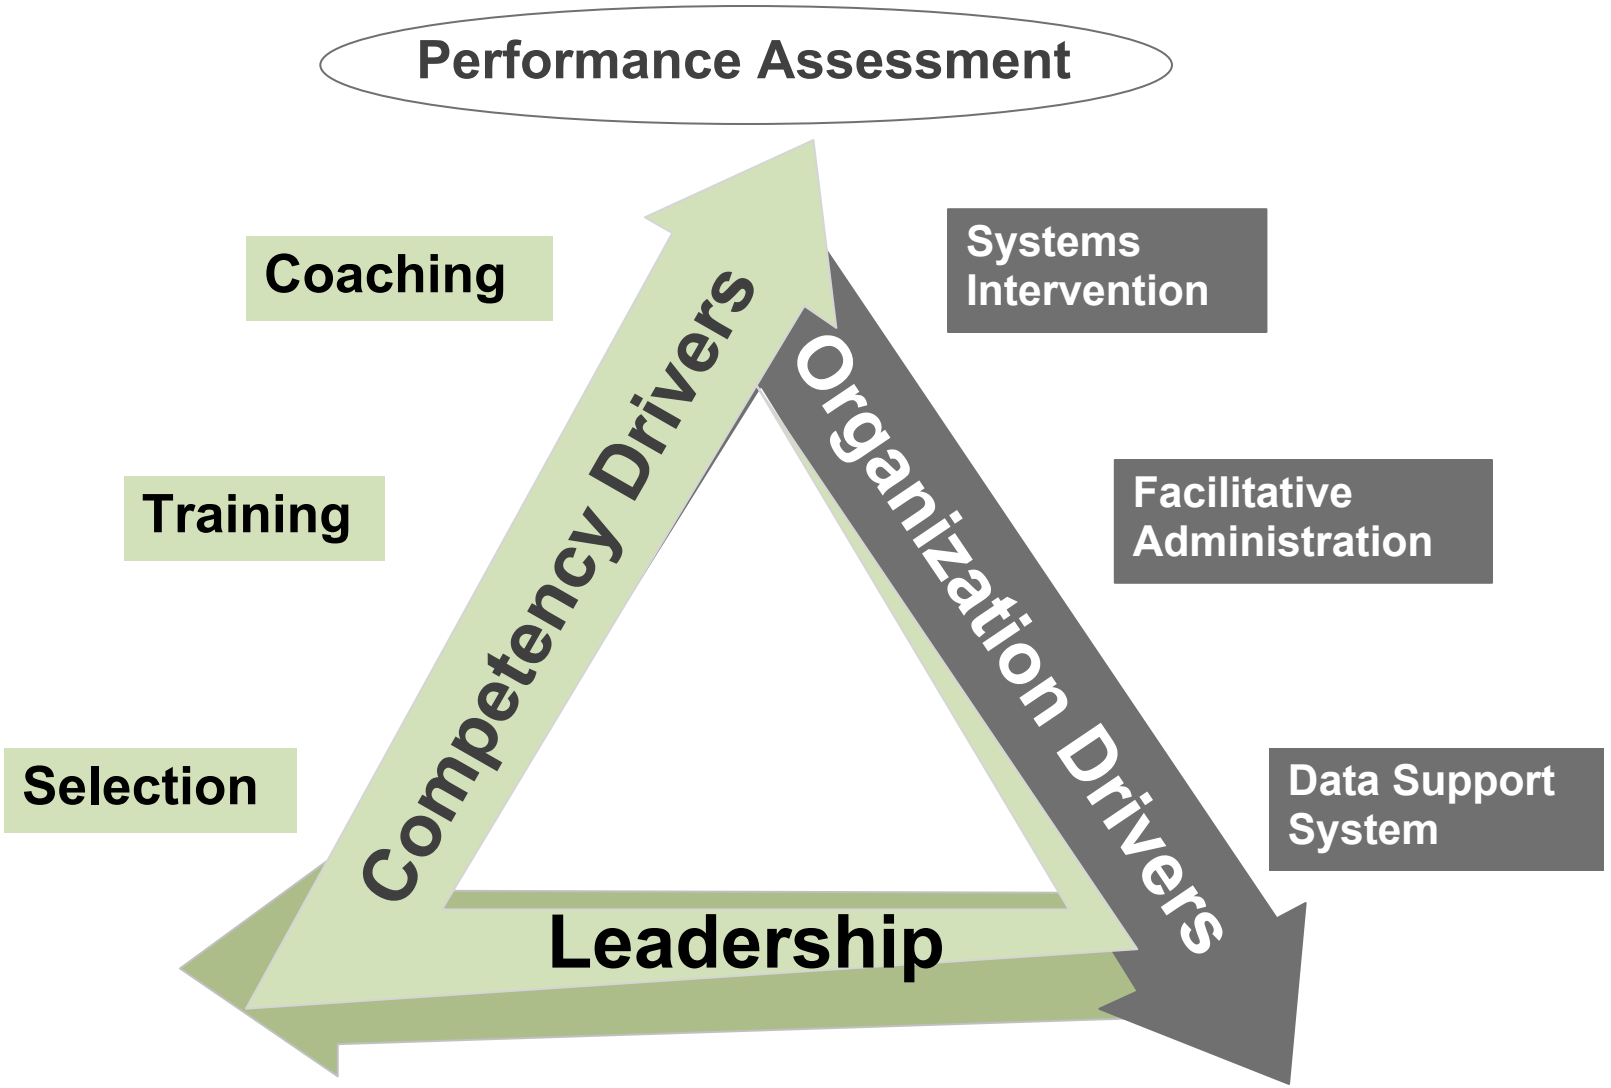

- Fidelity
- Scale
- Efficacy

Component 1: Implementation Stages

Slide created by the Minnesota Department of Education

Component 2: **Implementation Drivers**

Where Do We Go from Here?

- In what ways does the logic and process of Implementation Science contribute to educational and social services here in Minnesota?
- To what extent are we interested in…
  - Expanding the implementation of evidence-based practices?
  - Expanding the use of IS principles for improving local ‘practices’
  - Contributing to the knowledge base in implementation science?

Some Next Steps

- Are there ***evidence-based practices*** that you would recommend be considered for wide-scale implementation in MN? Interventions that effectively address socially meaningful goals or problems?
- Are there Implementation Science practices that you want to see used more broadly?

Evidence-Based Practices to Consider

- Positive Behavioral Interventions & Supports
- TACSEI
- Check and Connect
- Triple P: Positive Parenting Program
- Incredible Years
- Freedom School

http://z.umn.edu/ImplementationScience2

Implementation Science Practices

- Bottom-up program selection
- Coaching
- Fidelity checks
