Technology Help for Students

Many courses at the University of Minnesota make use of tools that enhance learning. You may be familiar with some technologies such as Canvas, Zoom and Google Drive. The following is a list of additional, commonly used technologies in CEHD and their associated help resources.

- Box
- Canvas
- ChimeIn
- FlipGrid
- Google Drive
- GoReact
- iClicker
- Kaltura MediaSpace
- Screencast-O-Matic
- Video
- VideoAnt
- Voicethread
- Vimeo
- YouTube
- Zoom
- U of M Technology Support

Box

Box Secure Storage is a cloud storage and collaboration service configured to meet the University security standards for HIPAA data.

- Enroll/Sign In to Box at UMN
- Upload files to Box
- Create folders in Box
- File ownership and icons in Box
- Share files and folders with collaborators in Box
- Delete files and folders in Box

Learn more about additional or specialized features of Box within the UMN Box Self-Help Guides.

Canvas

Learn more about how to use Canvas by watching the following videos covering common Canvas actions or activities.

- Canvas Overview
- Update Your Profile
- Update Your Notification Preferences

DIGITAL EDUCATION AND INNOVATION
College of Education + Human Development

- Communicate with Your Instructor and Peers
- Participate in Discussions
- Keep Track of Assignments Due
    - Guide: Add the Canvas Calendar to Your Google Calendar
- Submit Your Assignments
- Participate in a Group
- Check Your Grades
    - View Assignment Feedback from Your Instructor
- Canvas Student App

You can also learn more about the features of the Canvas learning management system by reading their full guide for students. Find it here

ChimeIn

ChimeIn is a web based response tool. Instead of using Clickers, use ChimeIn on devices such as web browsers, phones or text messages.

- Student Basics
- ChimeIn with Cell Phones

FlipGrid

Flipgrid is a web based tool that allows for short video discussion.

- Joining a Grid
- How to Record and Submit a Video

Google Drive

Google Drive, you can create and share files and folders online and collaborate with others on group projects.

- Create, view or save a file to Google Drive
- Upload files and folders to Google Drive
- Download a file from Google Drive
- Sharing files on Google Drive
- Using comments in Google Drive
- Move content in Google Drive
- Delete Google Drive Files
- Recover a deleted file in Google Drive

CC BY

GoReact

GoReact is an online video recording tool that allows for synchronous and asynchronous video viewing, commenting, instructor feedback, and grading. In EPSY GoReact is used for ASL assignments and exams.

- Getting Started with GoReact in Canvas
- Recording a Video
- Trimming a Video
- Recording a Group Presentation with Slides
- Submitting to a Comment Only Assignment
- Uploading a Video

iClicker

iClicker is an audience polling tool that lets instructors ask students questions during class and display their responses almost immediately.

- Purchase and Register an iClicker Remote for class

Kaltura MediaSpace

Kaltura is a storage platform for video and audio files used for teaching, learning, non-PHI research, and outreach.

- Log in to Kaltura MediaSpace
- How to upload videos to Kaltura
- Share and manage access to Kaltura videos
- Edit Kaltura media
- Review and edit captions in Kaltura

Screencast-O-Matic

Screencast-O-Matic is an application for Mac and Windows computers that records screen activity and/or your webcam. You can record a PowerPoint or Google Slides presentation, or demonstrate a tool directly from your computer. When you're finished, you can save the recording to your desktop, then publish the video on your YouTube channel, in a textbox using Kaltura within Canvas, in Google Drive, or on another video publishing site.

- Download and set up Screencast-O-matic through the U of M
- Recording and Editing in Screencast-O-Matic

Video

There are many ways to create video to use for classes. Your instructor may have specific parameters or tools they wish you to use. Be sure to read their directions carefully. If you are free to create a video in whatever way you wish but are not sure where to start, the following guide will be helpful.

- Video Project Guide for Students
- Submitting a Video Assignment Using Kaltura and Canvas
- Video Discussion Using Kaltura and Canvas

VideoAnt

VideoAnt is a web-based video annotation tool for mobile and desktop devices. Use VideoAnt to add annotations, or comments, to web-hosted videos.

- Sign In to VideoAnt
- Annotating and Commenting on Videos

Voicethread

A VoiceThread is a collaborative, multimedia slideshow that holds images, documents, and videos. You can view a VoiceThread, comment on a VoiceThread, or create and submit your own VoiceThread slideshow.

- Submit a Voicethread Assignment
- Comment on a Voicethread Assignment
- Watch a Voicethread Assignment

Vimeo

Vimeo is an online video storage and streaming site.

- Creating videos in Vimeo
- Uploading to Vimeo

YouTube

YouTube is a free online video sharing tool. Users can upload and/or edit videos, organize videos that have been uploaded into playlists and share videos (either publicly or privately) with others.

- How to upload a video to YouTube
- How to share a video on YouTube
