Examiner Initials: _____

Gutenberg – Oral Reading

Johannes Gutenberg was born in 1398, in Germany. His father worked in the 13
town mint, which is where coins were made. Young Gutenberg grew up learning a 27
lot about gold-smithing, or how to make things out of gold. 39

While he was a teenager, Gutenberg also worked at the town mint. He 52
learned about printing on metal coins, which gave him the idea of printing books. 66
At that time, all books were copied by hand. It was very slow. It took a very long 84
time to make one book. Gutenberg thought there must be a faster way. He 98
thought if books were made by machine, then many books could be made at one 113
time. Gutenburg came up with a way to make metal letters for printing. He 127
learned that the letters had to be the same height for them to print in a straight 144
line. 145

He had two print shops, one for printing the Bible and one for all other kinds 161
of books. The first item ever printed on Gutenberg's press was probably a German 175
poem. Gutenberg printed the first Bible in 1455. It was known as the Gutenberg 189
Bible. Some of the first copies still exist. They are among the world's greatest 203
treasures. Gutenburg also built up a good business printing schoolbooks. 213

The method Gutenberg invented for printing books has stayed the same for 225
hundreds of years. Next time you read a book, think of Gutenberg. He made 239
printing books fast and easy! 244

Maria and the Lizard – Oral Reading

Maria was spending the summer with her Grandmother in the country. She 12
had never visited the country, and did not think that she would like it there. She 28
hoped the summer would pass quickly so that she could go back home. 41

On the first morning, Maria watched lizards chase each other on the back 54
wall outside the house. After a while, Grandmother joined her to watch the 67
lizards. "Look how fast they are!" said Maria. 75

"Not all of them are fast," said Grandmother. "Look at that lizard over 88
there." She pointed to one that was sitting on a rock. 99

"Do you think there's something wrong with it?" asked Maria. "I thought 111
lizards were always running around." 116

"I don't know," said Grandmother. "Perhaps we can find someone who 127
knows about lizards." 130

They went next door to see Mr. Pablo. They asked him what he knew about 145
lizards. He said that sometimes they sit very still so that other animals can't see 160
them. 161

"Maybe he was just taking a break," said Mr. Pablo. 171

They went back to Grandmother's yard. The lizard was no longer sitting on 184
the rock. 186

Suddenly, two lizards ran by. "Oh! I think that was our lizard!" said Maria. 200

"There was nothing wrong with it, just like Mr. Pablo said," said Grandma. 213

"Now, it's time for lunch!" 218

"Wow," said Maria. "This morning went by fast! I'm glad the lizard is OK. 232
And I guess the country is not so bad, after all." 243
