Research Questions

What is the effect of the tutoring and mentoring process on participants' attitude/confidence towards mathematics?

What is the nature of "mentutor" – "mentutee" relationship?

What is the effect of the tutoring and mentoring process on participants' mathematics achievement?

Impact

Giving Back…Math is More than Just Me

"This program really is a great way of giving back to the community and I feel like this program will increase math level success. Through more practice, people will become more familiar with materials and scores will rise… This program allows me to spend extensive time on math & helps me wipe the dust off of my algebra 1 & 2 skills. " (Gus, Grade 11 Participant)

Pre-Test Scores

Math SAT Average: 418.6
Goal: 10% Increase

Impact

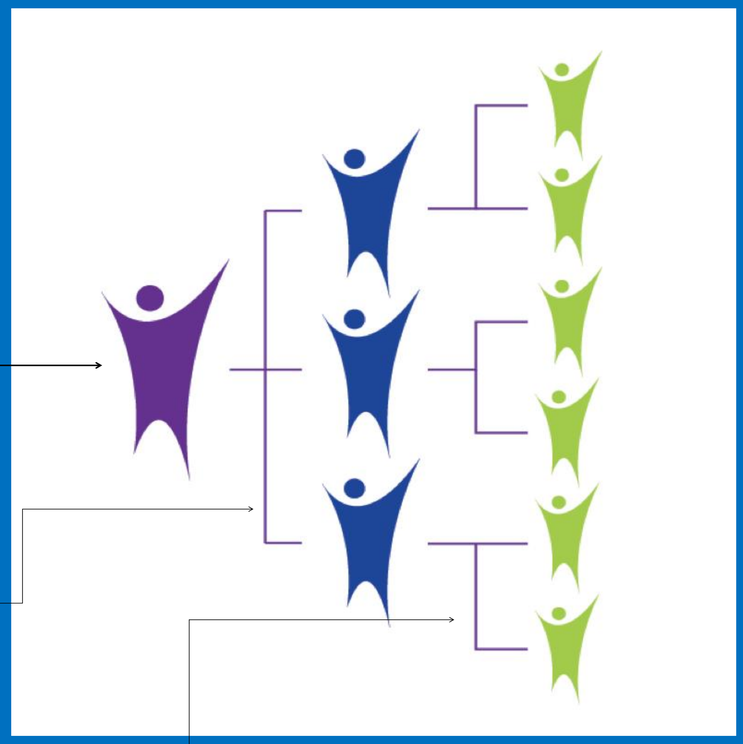

Positive and Uplifting Community

"The most positive experience is the work environment. I have never been so welcomed and so many of the undergrads are a part of the good of things; my mentor is always respectful and he asks me how I am every Saturday morning; he helps when I'm not sure about things, he don't judge-- he's always want us apart of our work; he push us because he wants us to succeed and just to have someone there that cares is positive thing. I feel this whole program is a positive experience." (Megan, Grade 11 Participant)

Overcoming Frustration Through Support

"My experience so far has been a fascinating journey. My tutor has answered and helped me understand math problems I found hard. He is fully engaged and gives me his full attention the whole time." (Adam, Grade 11 Participant)
