Culturally Responsive PBIS Activity Improves Class-Wide Behaviors of Diverse Students

Alexandria Muldrew, Anne Floyd, and Mahasweta Bose

Contributor: Faith G. Miller, Ph.D., LP, NCSP

February 21, 2020

UNIVERSITY OF MINNESOTA
Driven to Discover®

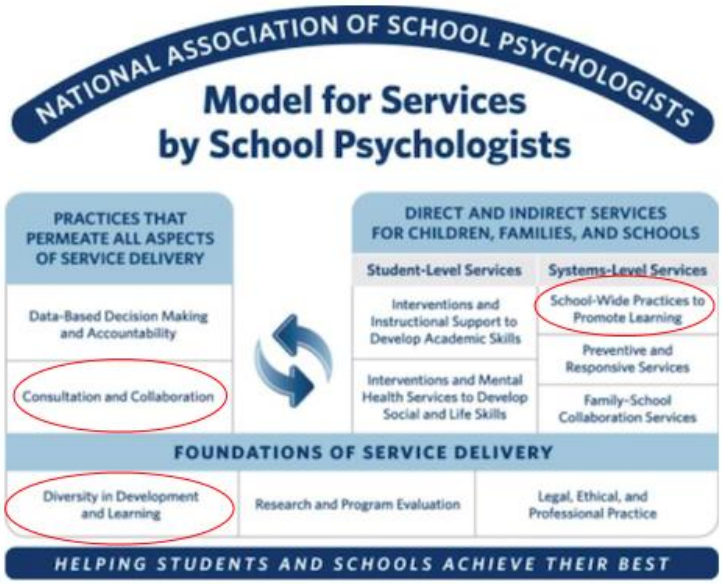

Objectives

- Review literature supporting implementation of culturally responsive PBIS
- Describe implementation of a culturally responsive PBIS activity, the Personal Matrix Activity
- Recommend other research-informed approaches on how to increase cultural responsivity of PBIS implementation

UNIVERSITY OF MINNESOTA
Driven to Discover®

from Muldrew, A. C., Miller, F. G., Floyd, A., & Bose, M. (2020, February). *Culturally Responsive PBIS Activity Improves Class-Wide Behaviors of Diverse Students*. Paper presentation at the annual convention of the National Association of School Psychologists, Baltimore, MD.

NASP Practice Model

Brief Review of the Literature

Recommended Positive Behavioral Interventions and Supports (PBIS) Practices
(Sugai & Horner, 2002; Sugai and Simonsen, 2012)

↓

Culturally Responsive PBIS (CRPBIS)
(McGoey et al., 2016; Vincent et al., 2011)

↓

The purpose of the present study was to examine the effects of the Personal Matrix Activity on the class-wide behaviors of culturally and linguistically diverse (CLD) students.

from Muldrew, A. C., Miller, F. G., Floyd, A., & Bose, M. (2020, February). *Culturally Responsive PBIS Activity Improves Class-Wide Behaviors of Diverse Students*. Paper presentation at the annual convention of the National Association of School Psychologists, Baltimore, MD.
Contact: muldr008@umn.edu

Research Questions

1. Is there a functional relationship between implementation of the Personal Matrix Activity and improvements in class-wide behaviors of CLD students as indicated by visual and quantitative analysis?

2. Based on responses from social validity questionnaires, do teachers and students perceive implementing the Personal Matrix Activity as acceptable or understandable?

Research Design

- Single Case Research Design
  - Multiple Baseline Design with individual classrooms serving as the unit of analysis
- Demonstration of effect:
  - 3 replications across several behaviors, participants, or contexts
- Benefits:
  - Each classroom served as their own control during baseline
  - No withdrawal of the intervention necessary

from Muldrew, A. C., Miller, F. G., Floyd, A., & Bose, M. (2020, February). *Culturally Responsive PBIS Activity Improves Class-Wide Behaviors of Diverse Students*. Paper presentation at the annual convention of the National Association of School Psychologists, Baltimore, MD.

Characteristics of Participants

Demographic characteristics of classrooms included in analyses.

Characteristic	Classroom A (n=17)	Classroom B (n=18)	Classroom C (n=21)	Classroom D (n=18)
Grade	1st	1st	4th	1st
English Language Learner (%)	82.4	61.1	66.7	66.7
Primary Language				
English	17.6	22.2	14.3	22.2
Somali	76.5	72.2	80.9	77.8
Spanish	5.9	22.2	4.8	0
Ethnicity				
Black	94.1	94.4	95.2	100
Hispanic	5.9	5.6	4.8	0
Sex				
Male	52.9	77.8	66.7	66.7
Female	47.1	22.2	33.3	33.3
Special Education Status	0	11.1	9.5	5.6

CRPBIS Activity

- Personal Matrix Activity developed recently by OSEP (Leverson et al., 2016)
- Field guide contains a number of recommendations for practice but nearly all are informed by research
  - Why could this be potentially problematic?
- Selected CRPBIS activity:

  The Personal Matrix Activity

School-wide Expectation	At SCHOOL It looks like...	At HOME It looks like...	In my NEIGHBORHOOD it looks like...
Be Safe	• Keep hands and feet to self • Tell an adult if there is a problem	• Protect your friends and family • Don't talk back	• Stick up for your friends • Don't back down • Look the other way
Be Respectful	• Treat others how you want to be treated • Include others • Listen to adults	• Do exactly what adults tell you to do • Don't stand out • Don't bring shame	• Text back within 30 seconds • Be nice to friends' parents • Share food
Be Responsible	• Do my own work • Personal best • Follow directions • Clean up messes	• Help your family out first • Own your mistakes • Share credit for successes	• Have each other's backs • Own your mistakes • Check in about what to do

Leverson et al., 2016

Primary Outcome Measure: Direct Behavior Rating – Single Item Scale (DBR-SIS)

Additional Outcome Measures

- Pre/Post Knowledge Questionnaire
- Office Discipline Referrals (ODRs)
- Social Validity Questionnaires
  - Students (researcher-created)
  - Teachers (URP-Iadapt)

Respectful Behavior (RB):

Compliant and polite behavior in response to adult direction and/or interactions with peers and adults. For example, follows teacher direction, pro-social interaction with peers, positive response to adult request, verbal or physical disruption without a negative tone/connotation.

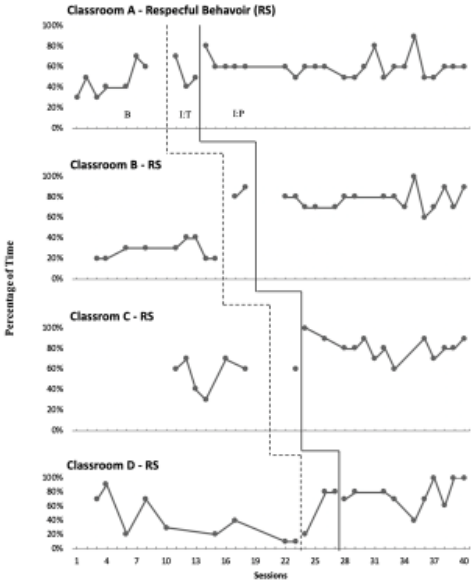

Figure 1. Teacher reported respectful behavior by classroom.
Note: Baseline phase (B), Intervention training phase (I:T), Intervention post-training phase (I:P)

Disruptive Behavior (DB):

Action that interrupts regular school or classroom activity. For example, out of seat, fidgeting, playing with objects, acting aggressively, talking/yelling about things that are unrelated to classroom instruction.

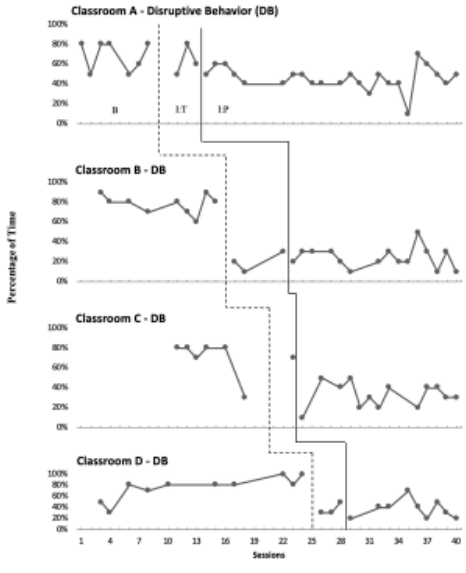

Figure 2. Teacher reported disruptive behavior by classroom.
Note: Baseline phase (B), Intervention training phase (I:T), Intervention post-training phase (I:P)

Pre/Post Knowledge Questionnaires

Pre-Personal Matrix Activity

- **42%** of students correctly stated the school-wide behavioral expectations acronym (i.e., PRIDE)
  - Of the 27 students who could identify the PBIS acronym only **9 (33%) correctly identified** each specific behavioral expectation associated with the acronym.
    - All **(100%)** provided relevant examples for each school-wide behavioral expectation

Post-Personal Matrix Activity

- **81%** of students correctly stated the school-wide behavioral expectations acronym (i.e., PRIDE)
  - Of the 51 who identified the PBIS acronym, **39 (76%) correctly identified** each specific behavioral expectation associated with the acronym.
    - 33 out of the 39 **(85%)** provided relevant examples for each school-wide behavioral expectation

Number of ODRs

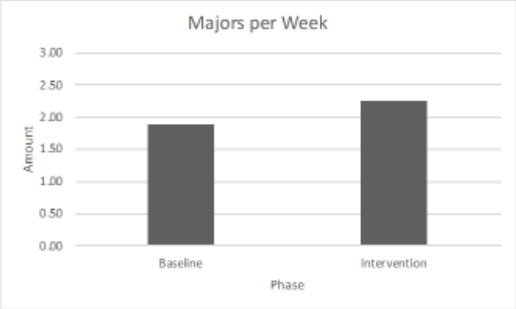

Figure 3. Number of Majors per week aggregated across classrooms during baseline and intervention

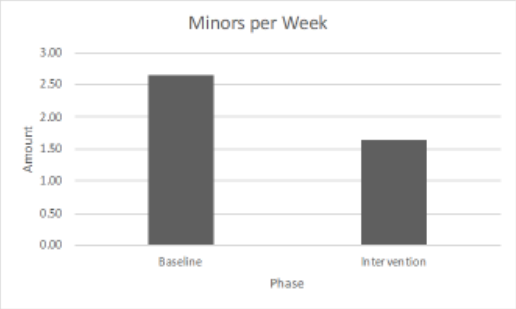

Figure 4. Number of Minors per week aggregated across classrooms during baseline and intervention

from Muldrew, A. C., Miller, F. G., Floyd, A., & Bose, M. (2020, February). *Culturally Responsive PBIS Activity Improves Class-Wide Behaviors of Diverse Students*. Paper presentation at the annual convention of the National Association of School Psychologists, Baltimore, MD.
Contact: muldr008@umn.edu

Types of ODRs

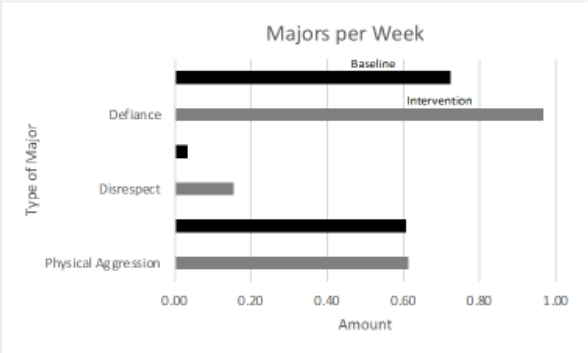

Figure 5. Type of Majors per week aggregated across classrooms during baseline and intervention

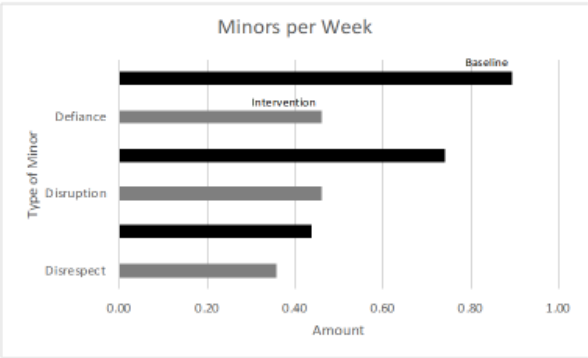

Figure 6. Type of Minors per week aggregated across classrooms during baseline and intervention

Social Validity Questionnaires

Students

- **91.8%** Easy
- **81.6%** Helpful
- **79.6%** Fun
- **75.5%** Exciting
- **79.6%** Participate Again

Teachers

- **ALL** teachers reported the activity as understandable and acceptable

"My only negative feelings towards this is I fell my students know what to do and say but they don't make the choice to follow the expectations they know. Talking about it is important but how do we get kids to actually take ownership and actually **DO** what they say."

from Muldrew, A. C., Miller, F. G., Floyd, A., & Bose, M. (2020, February). *Culturally Responsive PBIS Activity Improves Class-Wide Behaviors of Diverse Students*. Paper presentation at the annual convention of the National Association of School Psychologists, Baltimore, MD.
Contact: muldr008@umn.edu

Discussion

- The Personal Matrix Activity improved the class-wide respectful and disruptive behaviors of diverse students
  - Findings support that the Personal Matrix Activity is a Tier 1 intervention
- Both teachers and students perceived the Personal Matrix Activity as acceptable and understandable
- This is the first study (that we know of) to empirically evaluate the Personal Matrix Activity, so obviously more research is needed to see if results from the present study hold
- ***Effective*** culturally responsive practices need to be identified through research and implemented in practice

Takeaways and Future Directions

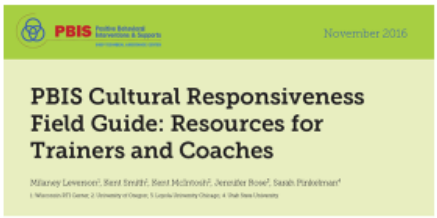

- Empirical support is provided on the effectiveness and acceptability of Personal Matrix Activity, for students from diverse backgrounds.
- A shift towards establishing an empirical support base for culturally responsive behavioral practices is critical.
- Future research should focus on studying if the positive effects are sustained after implementation of the Personal Matrix Activity.
- Investigating Tier 2/Tier 3 culturally responsive behavioral supports

Other Recommendations for CRPBIS

- Identity Awareness
- Tiered Fidelity Inventory (TFI) Cultural Responsiveness Companion
- Teams seek feedback from school staff, students, families, and community members
- Teams include family and community members as teachers of behavior expectations
- School staff use the Validate, Affirm, Build, and Bridge (VABB) approach
- Teams examine trends in disaggregated data to identify disproportionality in discipline practices
