Agenda

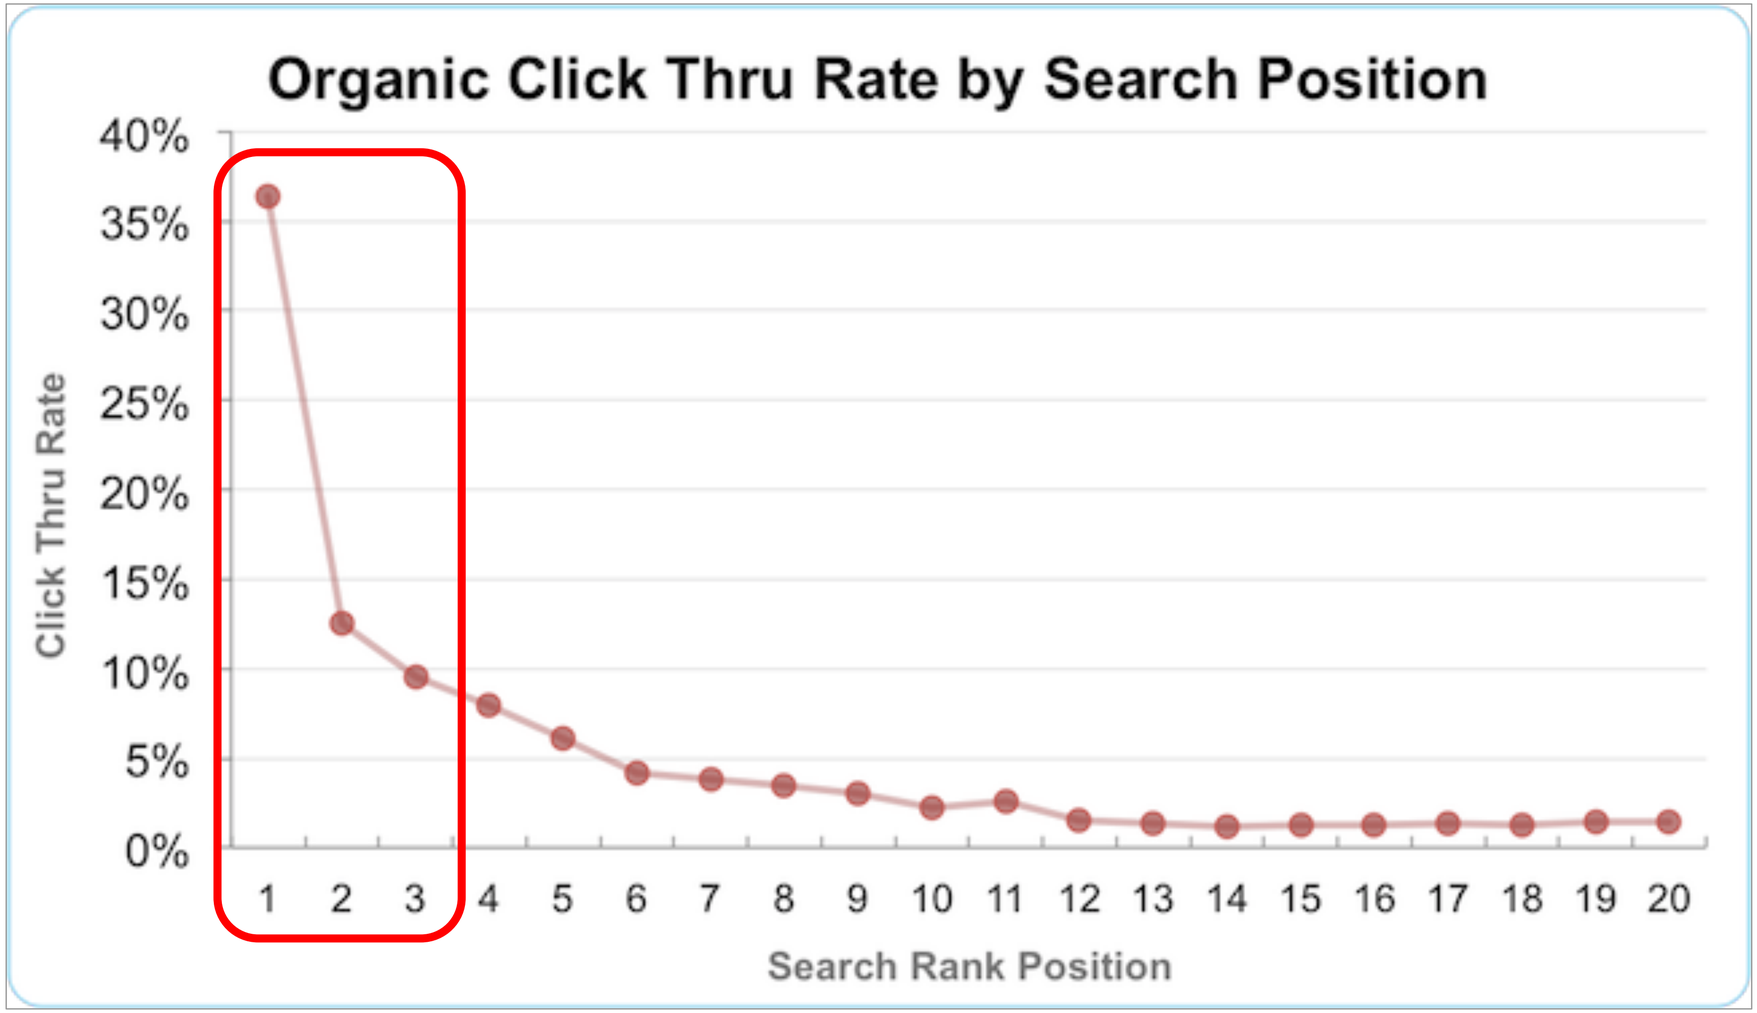

1. What are the goals of SEO?
2. How do search engines work?
3. Analysis of SERPs & Search Intent
4. Evolution of Search Engines
5. Keyword research best practices

What are the goals of SEO?

Goal:
Drive traffic to your pages from organic channels

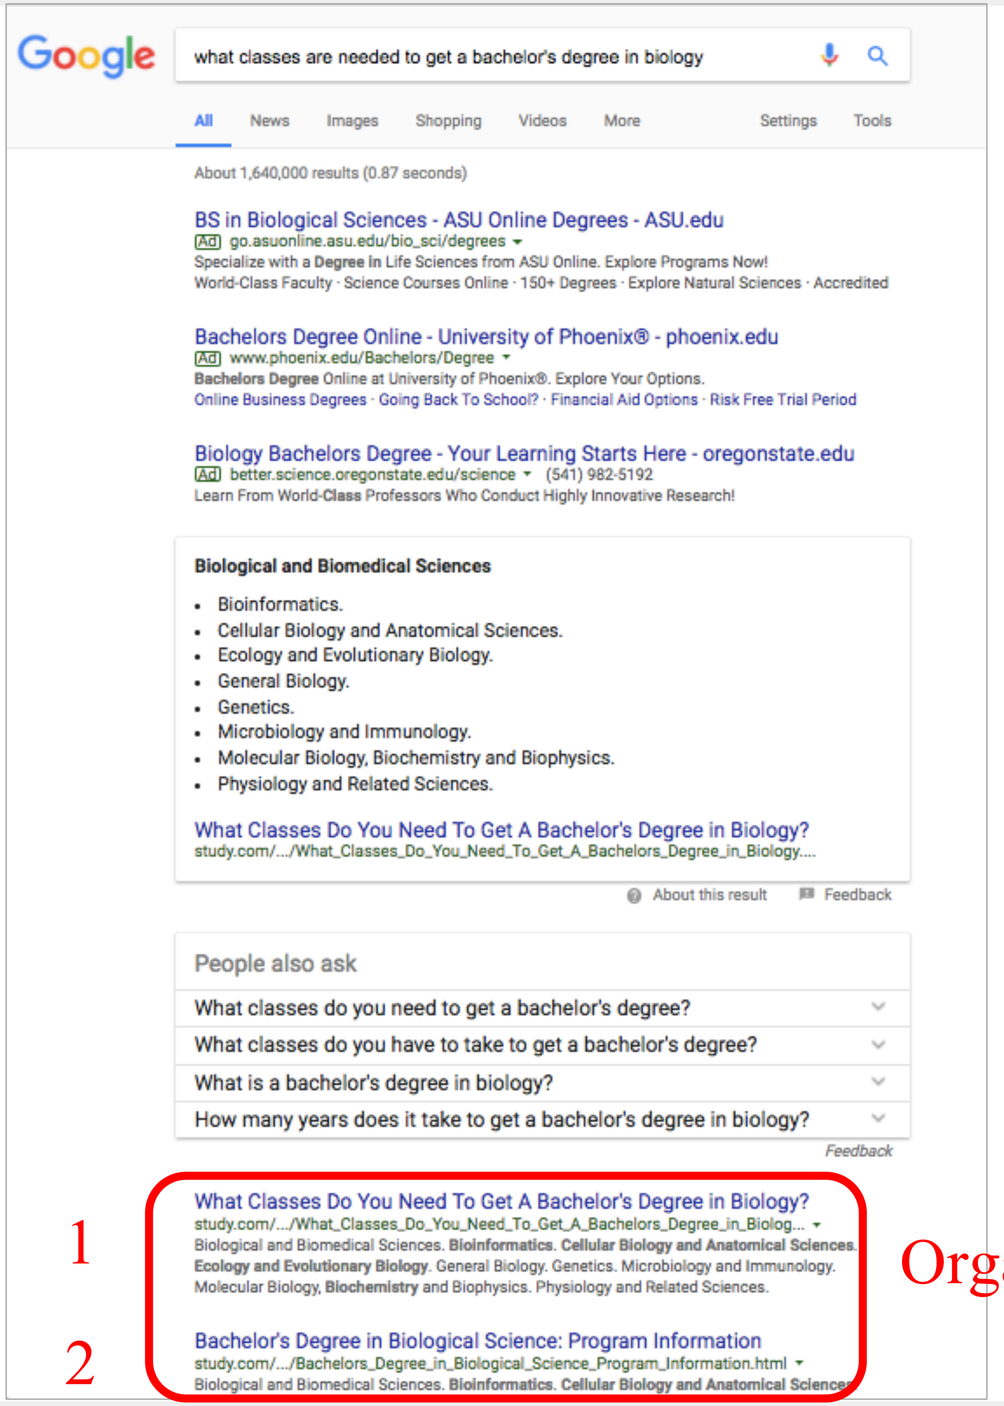

“I want to rank better in search results”

What is a good rank?

Measurable business goal

Goal:
Generate traffic from search engines by ranking in top 3-5 positions for targeted **keywords**

Organic rank positions

… but it is more than rank positions

1. **Rank** for keywords your customers use
2. Win the **click-through** to your pages
3. Retain the on-site **visit**
4. Have people **share** and promote your content

Rank
Click

Promote content to generate links that function as “endorsements” of your site’s value

Opportunities

1. Optimize pages for more than just rank position

What does a search engine do?

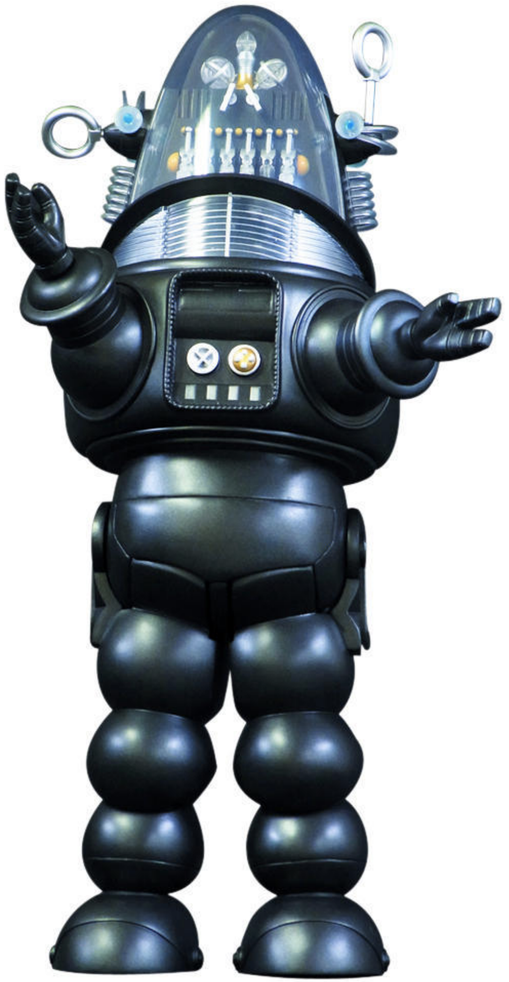

Google’s mission:

“To organize the world’s information and make it universally accessible and useful.”

What is a search engine?

Search engines are machines that **find** and **deliver value** to people.

Find: Crawl & index

Deliver: Rank what they find

Crawling & Indexing

Crawling

1. Start at some known website
2. Crawl through links between pages
3. Store the page data in an easy-to-retrieve format

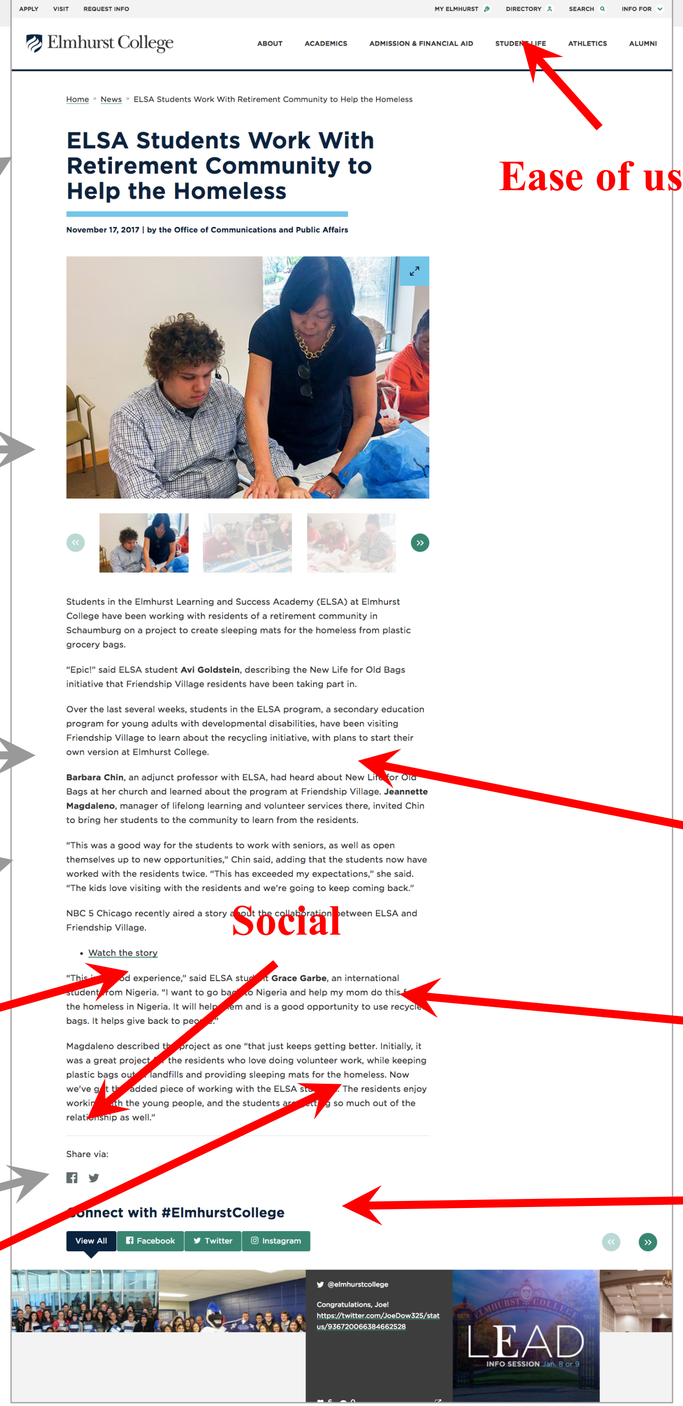

Indexing

Structure the collected data to make it accessible for search

Google data storage center

Page title

Images

Internal & external links

Heading tags

Security certification

Load speed

On-page user behaviors

Ease of use

Readability

Social

Inbound links

Domain Authority

Page attributes are recorded and assigned a value

200+ ranking signals

Opportunities

1. Optimize pages for more than just rank position
2. Identify systematic non-content issues

Let’s talk about SERPs

Title Tag
What is a title tag?
A title tag is an HTML element that specifies the title of a web page. Title tags are displayed on search engine results pages (SERPs) as the clickable headline for a given result, and are important for usability, SEO, and social sharing. The title tag of a web page is meant to be an accurate and concise description of a page's content.
Enter your title below to see how it would appear in Google's search results.
Title Tag Preview Tool
For the most accurate results, view on a desktop browser.
Code sample
<head>
<title>Example Title</title>
</head>
Optimal format
Primary Keyword - Secondary Keyword | Brand Name
8-foot Green Widgets - Widgets & Tools | Widget World
Optimal title length
Google typically displays the first 50-60 characters of a title tag. If you keep your titles under 60 characters, our research suggests that you can expect about 90% of your titles to display properly. There's no exact character limit, because characters can vary in width and Google's display titles max out (currently) at 600 pixels.
Why are title tags important?
Title tags are a major factor in helping search engines understand what your page is about, and they are the first impression many people have of your page. Title tags are used in three key places: (1) search engine results pages (SERPs), (2) web browsers, and (3) social networks.

H2 tag

H3 tag

H3 tag

Optimal title length

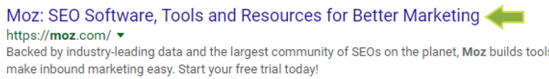

Google typically displays the first **50-60 characters** of a title tag. If you keep your titles under 60 characters, our research suggests that you can expect about 90% of your titles to display properly. There's no exact character limit, because characters can vary in width and Google's display titles max out (currently) at 600 pixels.

Why are title tags important?

Title tags are a major factor in helping search engines understand what your page is about, and they are the first impression many people have of your page. Title tags are used in three key places: (1) search engine results pages (SERPs), (2) web browsers, and (3) social networks.

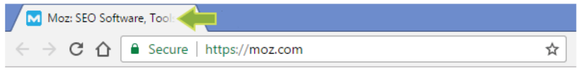

1. Search engine result pages

Your title tag determines (with a few exceptions) your display title in SERPs, and is a search visitor's first experience of your site. Even if your site ranks well, a good title can be the make-or-break factor in determining whether or not someone clicks on your link.

2. Web browsers

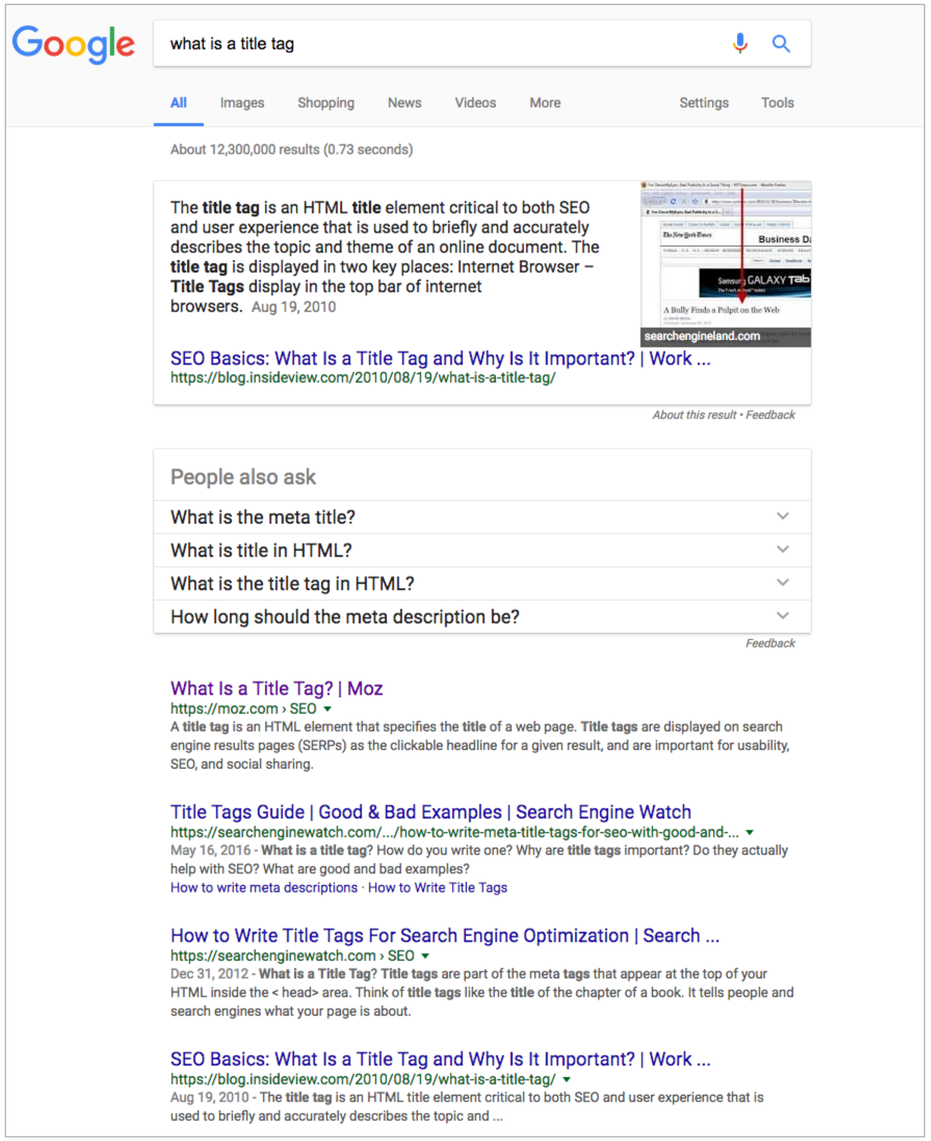

Your title tag is also displayed at the top of your web browser and acts as a placeholder, especially for people who have many browser tabs open. Unique and easily recognizable titles with important keywords near the front make sure that people don't lose track of your content.

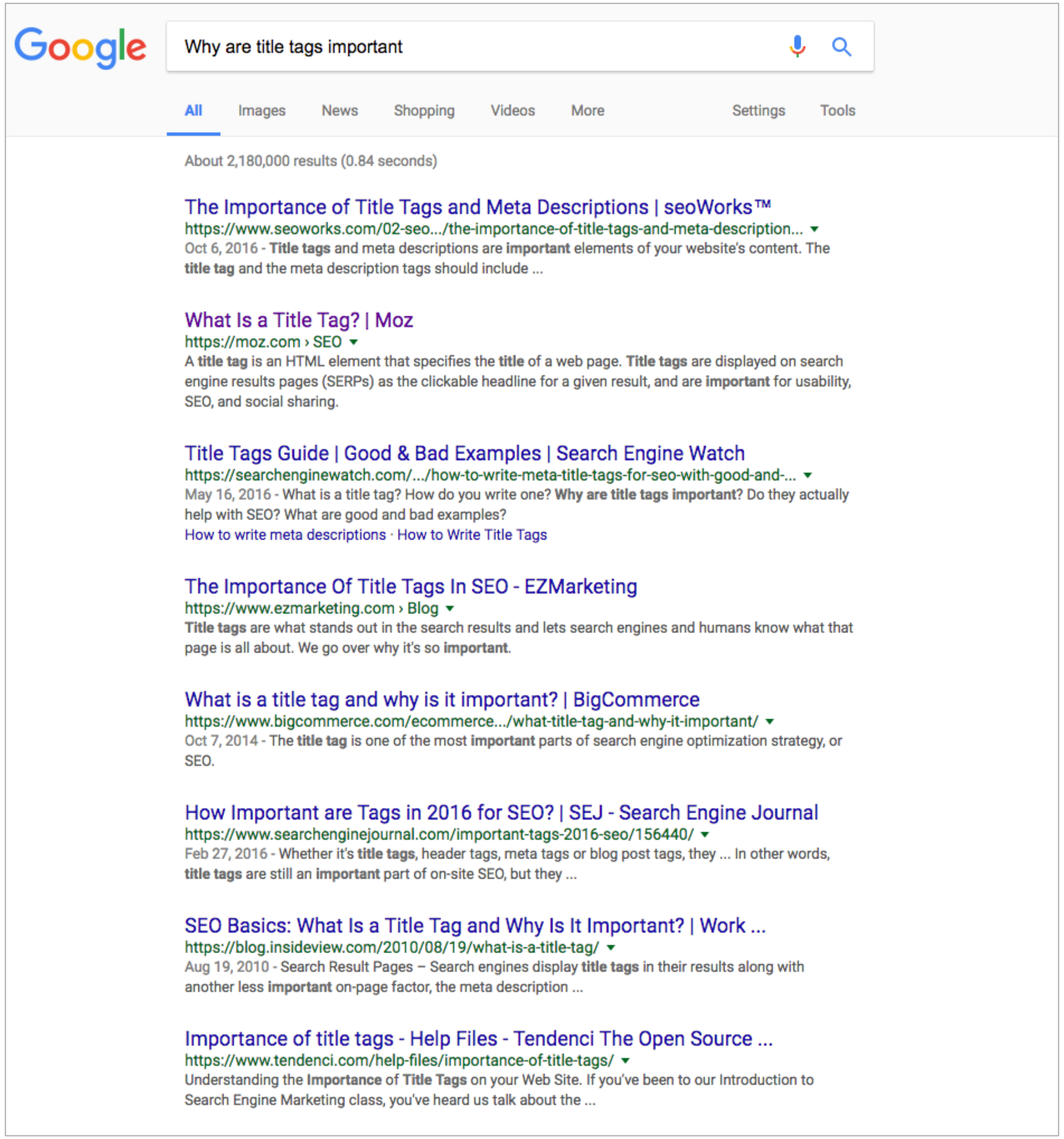

3. Social networks

Some external websites—especially social networks—will use your title tag to determine what to display when you share that page. Here's a screenshot from Facebook, for example:

STAGES	UNDERSTAND & EXPLORE	NARROW CHOICES & APPLY	DECIDE & ACCEPT	COMMIT & TRANSITION
THOUGHTS	• Why do I want to do this? • What programs are right for me? • How do my options compare financially? • What will my life be like at each place I'm considering? • When should I visit campus? • How many places should I apply to?	• What's the right balance of size, cost, location? • Where will I get research experience? Study abroad? • What are my short list of options? • Who would I be working/studying with? • How will I prepare for my interviews? • What are the dorms and dining halls like?	• What were my experiences with current students, faculty, and counselors like? Will I fit in? • What will I do outside of class? • If I get into multiple places and get similar offers, how do I choose?	• How do I prepare for this transition? • What do I need to know about next steps? • What am I not thinking about forgetting?
FEELINGS	• Excitement: This is the next big step in my life! • Empowerment: I 'll finally have control over my learning. • Confusion: So many institutions to choose from! • Anticipation: This will be difficult, and may be fun. • Fear: I have no idea what I want to do, and I'm scared to make the wrong choice of school and major.	• Apprehension: I need to make sure I get my applications in on time. And I don't like interviews. • Hopefulness: I've found some places that feel right, and I'm closing in on a choice • Annoyance. All. The. Paper.	• Anxiety: I can't stand the waiting. • Thrill: I got in! This is my dream! • Need for validation: Where are my friends going? • Confidence: I'm making the right choice! • Doubt: Am I making the right choice? • Frustration: Financial aid is so complicated!	• Relief: I've made it through this intense process and am ready for the next step. • Ambivalence: There are big life changes ahead, and I'm feeling both good and bad about those changes. • Impatience: Now that I've made my decision, I really want to start. • Giddiness: This is actually happening!
ACTIONS				
TRUSTED SOURCES	• College/university websites • Print materials • Third-party sites • Google • High School counselors • Parents, family and friends • Alumni • Official and personal social media accounts • U.S. News and World Report • College fairs	• Personal experience from the campus tour • Impressions from virtual tours • Emails and other communications from admissions counselors • Academic department pages • Faculty biography pages	• Official and personal social media accounts • Parents, family, friends • High School counselors • Admissions counselors • Admitted students days • Return visits to campus	• Recently accepted students sites • Student life sites • Orientation packets
OPPORTUNITIES	• Create a wonderful user experience across all channels (print, web, social). • Demystify the process, especially for first-generation college students • Address misperceptions • Establish your brand	• Communicate community • Build a case for value and affordability • Promote programs , experiential learning opportunities, and study abroad possibilities	• Ease anxiety during the waiting process • Reaffirm reasons to choose your college • Strengthen connections with counselors and faculty	• Ease the tactical process by providing clear information, checklists, dates and deadlines • Ease the emotional process by helping people make connections and imagine • Help students see themselves as heroes in their own story • Facilitate connections • Orient students to their new world
STORTTELLING PRINCIPLES	• **Go deeper.** Every college changes lives, most professors care, the luckier students find lifelong friends, and all schools offer great alumni networks. Get specific — the story is in the details.	• **Don't focus on original, focus on true.** We're wired for patterns, and we look for inspiration.	• **Find the conflict.** Without the conflict, there is no story.	• **Remember that timing is everything.** Align the themes and plots of your story to the stage of your audience's journey.
